

Section 3: Current Electricity

Unlike static electricity, **current electricity** is the continuous flow of electrons along a wire. The electricity that powers your home, a phone, or a television is current electricity. The flow of electrons carries energy that can be converted into other forms of energy, such as light (in a light globe) or heat (in a heating element).

Questions:

1. True or False: Electrical appliances are powered by static electricity.

2. What is an electric current?

3. Provide two examples of how the energy from an electric current is transformed into other types of energy.
Example 1: _____
Example 2: _____

Challenge Question: Think of a device that transforms electrical energy into at least three other forms of energy. Name the device and describe the energy transformations.
