Thaiyal Nayagi, R. Mahendran, 2021-01-13. Covering all of the basic concepts from three phase power supply and its various types of connection and conversion to power equation and discussions of the protection of power system to transformers, voltage regulation, and many other concepts, this volume is the one stop go to for all of the engineer's questions on basic electrical and instrumentation engineering. There are chapters covering the construction and working principle of the DC machine, all varieties of motors, fundamental concepts, and operating principles of measuring and instrumentation, both from a high end point of view and the point of view of developing countries, emphasizing low cost methods. A valuable reference for engineers, scientists, chemists, and students, this volume is applicable to many different fields across many different industries at all levels. It is a must have for any library. **Electric Power Transmission System Engineering** Turan Gönen, 1988. This is a book for engineers involved with the mechanical design of electrical transmission systems. It includes a review of transmission system engineering and the basics of analysis, and then goes on to cover in detail topics such as the construction of overhead lines, structural supports, insulation requirements, vibration, sag and tension analysis, right of way planning, and methods of locating structures and underground cables. Also included is material about cost analysis methods and techniques which are unique to transmission line design, where fixed costs are shared among joint users. In addition to this, the development of system reliability reporting to conform to standard requirements is covered, along with a modern comprehensive treatment of the design aspects of electrical power systems. New topics of importance such as fault analysis, system protection, line balancing, and economic analysis are contained with a brief review of analytical techniques which are pre-requisites to designing a system or component. *Modeling and Simulation*, 1985.
