Electronics For Absolute Beginners Kadee:

Electronics for Absolute Beginners Philip Dixon,2020-12-27 The history of electronics can be traced back to 1874 when Irish scientist George Johnstone Stoney 1826 1911 suggested that electricity must be built out of tiny electrical charges Twenty years later he coined the name electron Interest in electronics gradually increased over the decades following Stoney's discovery In 1947 the transistor was invented by William Shockley John Bardeen and Walter Brattain at Bell Labs which revolutionized the computer industry by replacing fragile power hungry valves with much smaller and reliable devices During the 1950s and 60s computers became more powerful and smaller eventually leading to the introduction of the home personal computer PC in the 1970s Today electronic devices are all around us computers cell mobile phones televisions calculators hearing aids and cars are just a few examples of devices that form part of everyday life in the 21st century and which make use of electronics The purpose of this book is to introduce the subject of electronics to people who have no prior knowledge of the subject If you don't know what a prototyping breadboard is or have no idea what a resistor or diode do then this book will help you to gain a basic understanding of what electronics components exist and what they are used for You will also learn how to combine such components to build electronics circuits Although there is a logical flow in the way that information is presented you can pretty much jump around from chapter to chapter as it suits you picking out the material that is of most interest The book is split into two parts the first introduces the subject of electronics and the second contains a range of simple circuits to design and build Part 1 Getting Started with Electronics Chapter 1 Electricity and Electric Circuits Chapter 2 Equipment You Need in Your Electronics Laboratory Chapter 3 Safety Chapter 4 Resistors Chapter 5 Capacitors Chapter 6 Diodes Chapter 7 Light Emitting Diodes LEDs Chapter 8 Transistors Chapter 9 Integrated Circuits Chapter 10 The 555 Timer Chapter 11 Combining Electronics with Software Part 2 Designing and Building Electronics Circuits Chapter 12 Using an Electronics Prototyping Breadboard Chapter 13 Illuminating a Single LED Chapter 14 Using a Multimeter to Measure Voltage Current and Resistance Chapter 15 Connecting Multiple LEDs in Series Chapter 16 Connecting Multiple LEDs in Parallel Chapter 17 Using a Variable Resistor to Control the Speed of a Small DC Motor Chapter 18 Using Wind Power Chapter 19 Using a Transistor to Switch On an LED Chapter 20 Charging and Discharging a Capacitor Chapter 21 Building a Light Sensor Night Light Chapter 22 Introduction to Solar Power
