Introduction To Legal English 1 Routledge:

Corpus-based Translation of Private Legal Documents Patrizia Giampieri, 2024-06-15 Legal translation is hallmarked by peculiarities revolving around language intricacies particular formulae and system specificity issues At present there is a spectrum of legal corpora dedicated to court related topics and legislation but there is no corpus composed of private legal documents such as contracts and agreements This book wishes to bridge this gap by providing English Italian comparable corpora related to the domain of general terms and conditions of service together with a model for their use in the translation classroom It offers a novel contribution to the scientific community as it makes corpora of private legal documents available for consultation In addition it shows that legal corpora built by following rigorous methods can become reliable tools in translator training and most likely in translation practice This book is for students in Translation Studies professional translators researchers and scholars in legal language and legal translation as well as legal practitioners and lawyers

Law and Humanities Russell Sandberg, Daniel Newman, 2024-01-09 This edited collection provides the first accessible introduction to Law and Humanities Each chapter explores the nature development and possible further trajectory of a disciplinary law and field Each chapter is written by an expert in the respective field and addresses how the two disciplines of law and the other respective field operate This edited work therefore fulfils a real and pressing need to provide an accessible introductory but critical guide to law and humanities as a whole by exploring how each disciplinary law and field has developed contributes to further scrutinizing the content and role of law and how it can contribute and be enriched by being understood within the law and humanities tradition as a whole *Legal Translation Outsourced* Juliette R.

Scott, 2018-12-19 Outsourcing legal translation gives rise to dangers of information asymmetry goal divergence and significant risk This work reports on market behavior across 6 continents and 41 countries to underscore areas for improving cross border legal translation It contains original theoretical models aimed both at training legal translators and informing all stakeholders *Language and Legal Proceedings* Endurance Midinette Koumassol Dissake, 2021-06-17 This book

investigates language related problems which arise in courtroom discourse in the Republic of Cameroon in Central Africa While Cameroon has over 250 national languages court cases are conducted in the two official languages English and French This is despite the fact that 40% of the adult population is illiterate in these languages and means that lay litigants often encounter language related problems during trials In this study the author makes use of Speech Act Theory and Interactional Sociolinguistics to analyse the speech acts of both legal professionals and lay litigants as observed in 37 legal cases demonstrating how the use of exoglossic languages in a highly multilingual nation constitutes a serious issue The book will be of interest to students and scholars of Forensic Linguistics Language Policy and Planning and Discourse Analysis particularly those with an interest in the African context *The English Catalogue of Books: v. [1]. 1835-1863* Sampson

Low, James Douglas Stewart, 1873 **Corpus Approaches to Discourse in Forensic and Legal Contexts** David

Wright,2025-02-20 This book is the first of its kind to bridge the gap between corpus linguistics and forensic linguistics illustrating the value of applying corpus linguistic data tools and methods in the analysis of language in the law evidence crime and justice The volume begins by taking stock of the use of corpus linguistics in the field of forensic and legal linguistics over its roughly thirty year history as a foundation for critically reflecting on the current state of play within the discipline Wright uses this discussion as a jumping off point from which to demonstrate the opportunities and challenges of using corpora and corpus methods to analyse language in legal and forensic contexts and offers possible solutions to collecting and analysing types of data that are typically not in the public domain The five analysis chapters that follow apply corpus method to both established and emerging areas of forensic and legal linguistics summarized in a concluding chapter which also looks ahead to future directions for the interface of the two fields This book will be key reading for graduate students and researchers in forensic linguistics and corpus linguistics methods as well as scholars working across disciplines interested in the intersection between language and the law

Critical Legal Defence of Human Rights Ian Turner,2025-11-11 For many human rights have become a panacea for the injustices of society globalisation poverty discrimination climate change etc But has this rights inflation been a prima facie good Has the rise in human rights merely propounded a self centred individualism exacerbating the marginalisation of large swathes of society who are already socially excluded Rightly human rights have been the subject of a multitude of criticisms from a range of critical perspectives Marxism critical legal studies communitarianism feminism critical race theory etc However this unique study pushes back against this tide of anti rights providing an original defence of human rights from the perspective of a progressive political community of rights holders and duty bearers Possessing rights might place a rights holder at the centre of their moral universe to the exclusion of all others but that holder of rights cannot expect others to bear the duty of their rights without exercising the same obligation to the rights of others in return So far from emphasising isolation and self interest responsibilities arising from the exercise of rights engender a keen sense of solidarity a principle integral to critical legal theory The book will be of interest to academics and researchers working in the areas of Human
