A New Economic Theory of Public

Support for the Arts Arnaldo Barone, 2015-12-14 Should the arts receive public support Can the arts survive in a modern capitalist society Can economics shed light on the nature of public support and whether there is a rationale for public intervention This book undertakes to examine these questions as it explores the ways government and public resources are used to support the arts This book applies a Veblenian approach to understanding economic development to investigate public support for the arts in an effort to determine whether this approach can elucidate economic rationales for public support Divided into three parts the first provides basic information on public support for the arts by surveying support in the United States and Australia Part two includes a neoclassical overview of the topic while part three presents Veblen's ideas on economic development This book will be of interests to researchers concerned with cultural and institutional economics as well as political economy

Descentralizacion Para Satisfacer Necesidades Basicas J. Michael McGuire, 2009-02-17 This book addresses poverty and inequality in Latin America proposing decentralization of taxing and spending to lower government levels as a solution It outlines economic principles for decentralization and presents case studies serving as a guide for policymakers and practitioners to create an inclusive development process

Economic Regulation of Airports Di Mei, 2025-11-14 This book explores airport charges regulation presenting a fresh perspective on a crucial yet marginalized subject Providing a clear pathway for regulation of the economic aspects of airports specifically charges the book employs an adaptable approach grounded in private law principles Challenging the conventional command and control model of traditional regulation that once governed airports the book contends that an agile private law approach offers a more responsive and efficient means of overseeing airport charges in the face of increasing complexity within the industry Within this overarching approach two key instruments emerge First the book demonstrates the effectiveness of contracts as a powerful tool for integrating regulations on airport charges Second the cultivation of robust corporate governance is posited as a mechanism that naturally instigates effective regulation Through illuminating the efficacy of a private law approach the book demonstrates how this innovative approach not only works as a regulatory mechanism for airport charges but can also be applied within the broader spectrum of infrastructure regulation The book will be of interest to researchers in the field of air law contract law corporate law competition law and aviation business and management employing case studies to illustrate its points

Post-Independence Development in Africa David Mhlanga, Emmanuel Ndhlovu, 2023-07-11 The book *Post Independence Development in Africa Decolonisation and Transformation Prospects* revisits the development debates and development realities in Africa This is achieved by offering theoretical comments about post independence development in Africa and by providing historical details pertaining to the development approaches adopted in Africa immediately after independence in the 1960s and mid 70s Sitting at the intersection of two sets of scholarly literature namely

literature on development and literature on development discourses and practices in Africa the book comprises a mixture of detailed sector specific accounts of the status of development on the continent The chapters in the book also contribute to clarifying how the two strands of literature intersect using several case studies across Africa

Non-Economic Objectives in WTO Law Stefan Zleptnig, 2009-10-30 This volume examines the complex relationship between economic and non economic objectives in WTO law It discusses how non economic objectives such as the protection of public morals life and health environment or human rights can serve as justification for trade restrictive measures normally prohibited under WTO law The relevant non economic grounds of justification are analysed as well as the substantive and procedural requirements which restrain the use of trade restrictive measures taken for non economic purposes The issues covered by this book also have wider systemic implications for the WTO Only if the WTO can demonstrate that it is not just concerned about free trade but respects non economic objectives as well is it likely to remain a sustainable and legitimate form of governance

How Growth Really Happens Michael Best, 2021-12-07 Achieving economic growth is one of today s key challenges In this groundbreaking book Michael Best argues that to understand how successful growth happens we need an economic framework that focuses on production governance and skills This production centric framework is the culmination of three simultaneous journeys The first has been Best s visits to hundreds of factories worldwide starting early as the son of a labor organiser and continuing through his work as an academic and industrial consultant The second is a survey of two hundred years of economic thought from Babbage to Krugman with stops along the way for Marx Marshall Young Penrose Richardson Schumpeter Kuznets Abramovitz Keynes and Jacobs The third is a tour of historical episodes of successful and failed transformations focusing sharply on three core elements the production system business organisation and skill formation and their interconnections Best makes the case that government should create the institutional infrastructures needed to support these elements and their interconnections rather than subsidise individual enterprises
