Software Education Conference (SRIG-ET '94) Martin Purvis,1995 **Writing a Professional Life** Gerald J. Savage,Dale L. Sullivan,2001 This is the first collection of narratives by practicing technical communicators telling their own personal stories about the workplace and their lives on the job The authors portray a wide range of jobs writers editors interface designers marketing writers and trainers working in 9 different technical fields including software R D engineering medicine transportation and telecommunications The stories vividly demonstrate the unique power of narrative as a teaching and learning tool Unlike fabricated cases these real life narratives show new and veteran technical writers at work on the job dealing with tasks clients and co workers and revealing their insights values and attitudes about their work The stories also show the skills required in the profession and the ethical and other issues raised in the course of the workday For anyone interested in technical communication and professional writing **Writing in the Health Professions** Barbara Heifferon,2005 Practical applied and up to the minute Writing for the Health Professions teaches students healthcare professionals and professional writers the essential skills in medical and health communications Drawing on her extensive experience as a nurse cardio pulmonary technician medical writer and writing teacher Barbara Heifferon addresses the communications requirements of the healthcare professions and those who write in these high tech fields This comprehensive text covers writing situations and documents common in hospitals clinics HMOs health insurance companies public health campaigns and other healthcare environments Special attention is given to visual and electronic forms of communication including Web sites and multimedia productions Oral Presentations for Technical Communication Laura J. Gurak,2000 Oral Presentations for Technical Communication provides what most technical communication books lack clear accessible instruction on speaking This book helps professionals master public speaking in a technical or scientific environment whether it be through traditional presentations with whiteboards and flipcharts or presentations with computer software such as PowerPoint Unlike most general speech texts which include examples from various disciplines Oral Presentations uses specific examples from the fields of science and technology and shows how skilled technical

communicators make complex information accessible to non technical audiences The first three parts of the book focus on basic skills and concepts including four basic types of presentations relevant to technical communication The last two parts introduce more advanced topics such as legal privacy and censorship issues and the changing nature of presentations in the digital age Oral Presentations thus brings together the best most current instruction from three fields technical communication rhetoric speech communication and computer and information technology For professionals in public speaking oral presentations and technical communication

CCCC Bibliography of Composition and Rhetoric, 1991
Gail E. Hawisher, Cynthia L. Selfe, 1993 The CCCC Bibliography of Composition and Rhetoric published for the Conference on College Composition and Communication offers teachers and researchers an annual classified listing of scholarship on written English and its teaching at the college level The 1991 volume lists and annotates 1 925 articles books dissertations and papers that with few exceptions were published during the 1991 calendar year A group of 171 contributing bibliographers prepared the citations and annotations for the entries appearing in this volume The CCCC Bibliography includes an index of authors and editors a subject index and entries cross referenced according to subject matter Considerably more comprehensive than other bibliographies in composition studies the CCCC Bibliography of Composition and Rhetoric draws upon a large group of experts in the field to aid teachers and researchers in sorting through a vast body of interdisciplinary material making their work easier and more effective Annotations accompany all entries in this volume They describe a publication s contents and are intended to help users determine its usefulness Annotations are brief and insofar as the English language allows are meant to be descriptive not evaluative they explain what an entry is about while leaving readers free to judge for themselves the work s merits Most annotations serve one of three functions they present the document s thesis main argument or major research finding they describe the work s major organizational divisions or they indicate the purpose or scope of the work The subject index lists most of the topics discussed in the works cited in this volume Consulting the Subject Index will help users locate sections and subsections containing large numbers of entries addressing the same topic Each document is cited and annotated only once under one of the five major sections of the CCCC Bibliography Each entry however receives an entry number so that cross references to other sections are possible This feature is especially useful because much scholarship in composition and rhetoric is interdisciplinary in nature Cross references appear as a listing of entry numbers preceded by See also found at the end of each subsection Entries appear under five major categories bibliographies and checklists theory and research teacher education administration and social roles curriculum and testing measurement and evaluation Although the CCCC Bibliography excludes master s theses textbooks computer software and book reviews from its coverage it furnishes citations to review essays articles appearing in some 220 journals scholarly monographs and essay collections dissertations abstracted in Dissertation Abstracts International and selected documents and conference materials available through ERIC

Record, 2003 **Journal of Business and Technical Communication**, 1992 Foundations for Teaching Technical Communication Katherine Staples, Cezar M. Ornatowski, 1997-12-31 This is designed to be a seminal textbook for researchers and teachers of scientific and technical communication. It draws together contributions from scholars in the field covering the three broad themes of theory, practice, and program design while focusing on topics of contemporary concern. These include insights into the relevance of cognitive psychology for technical communication, ethics, and multicultural issues; impact of new technologies; visual communication; design of teaching and research programmes; and quality and evaluation.

Principles of Web Design David K. Farkas, Jean B. Farkas, 2002 This is a conceptually rich book that teaches web design skills and offers practical guidance within a coherent framework of information design principles and hypertext theory. With a very clear yet trim writing style and over 150 illustrations, this book offers a broad range of discussion items. An emphasis on intellectually challenging questions calls for review and synthesis, problem solving, and the focused examination of Websites. A set of 30 Quick Start design principles enables readers to begin working on a project. Explanation of copyright issues includes public domain, content, fair use, and related issues. Emphasis on usability testing and other forms of evaluation teach the importance of involving users in the design process and help plan and conduct basic usability tests. For those interested in multimedia and web design.

Global Contexts Deborah S. Bosley, 2001 A dozen case studies, some fiction, some real, for use in a graduate or undergraduate technical communication course. They reveal issues relevant at the international level, offer strategies for recognizing behaviors and patterns of thinking and feeling that affect technical documentation and identity.

Technical Marketing Communication Sandra W. Harner, Tom G. Zimmerman, 2002 This book provides the necessary preparation for the breakneck speed of technical marketing communications in today's Internet economy. A progressive approach first explains the role and responsibility of marketing communication in a technology-filled world. Then, on that foundation, the book progressively introduces the concepts of needs analysis, audience analysis, strategy development, media choices, tactics, and continuous evaluation. A first-person scenario opens each chapter, giving readers a glimpse of real-world experiences as told by professionals in the field. A Summing It Up section at the end of every chapter provides a quick reference guide to the most important material covered in the chapter. An Applying What You've Learned section at the end of every chapter includes exercises and discussion starters. For those interested in expanding their skills in technical marketing communication.
