Instructor's Manual with Tests, Fourth Edition, "Behavior Modification: what it is and how to Do It" Garry Martin, Joseph Pear Garry Martin, 1992

The Science of Learning Joseph J. Pear, 2016-03-02 For over a century and a quarter the science of learning has expanded at an increasing rate and has achieved the status of a mature science It has developed powerful methodologies and applications The rise of this science has been so swift that other learning texts often overlook the fact that like other mature sciences the science of learning has developed a large body of knowledge The Science of Learning comprehensively covers this knowledge in a readable and highly systematic manner Methodology and application are discussed when relevant however these aspects are better appreciated after the reader has a firm grasp of the scientific knowledge of learning processes Accordingly the book begins with the most fundamental and well established principles of the science and builds on the preceding material toward greater complexity The connections of the material with other sciences especially its sister science biology are referenced throughout Through these frequent references to biology and evolution the book keeps in the forefront the recognition that the principles of learning apply to all animals Thus in the final section the book brings together all learning principles studied in research settings by demonstrating their relevance to both animals and humans in their natural settings For animals this is the untamed environment of their niches for humans it is any social environment for Homo sapiens is the social and learning animal par excellence
