Grand Challenges in the Field of Earth Science Collaborative, 2015-11-23 *Frontiers in Earth Science* is an open access journal that aims to bring together and publish on a single platform the best research dedicated to our planet. This platform hosts all the rapidly growing and continuously expanding domains in Earth Science involving the lithosphere including geology, geophysics, geochemistry, and geography; the hydrosphere including hydrology and cryospheric, marine, and ocean sciences; complementing the existing *Frontiers* journal on Marine Science; and the atmosphere including meteorology and climatology. As such, *Frontiers in Earth Science* focuses on the countless processes operating within and among the major spheres constituting our planet. In turn, the understanding of these processes provides the theoretical background to better use the available resources and to face the major environmental challenges including earthquakes, tsunamis, eruptions, floods, landslides, climate changes, sea level rise, extreme meteorological events; this is where interdependent processes meet requiring a holistic view to better live on and with our planet. Within this volume are included the Grand Challenge papers for the Earth Science field authored by the Field Chief Editor and several of the 16 online specialty sections authored by the respective Chief Editors. These articles identify and describe the crucial challenges for Earth Science at the dawn of the 21st century.

Earth's Structure and History, 2003-01-14 *Geosciences and the Sustainable Development Goals* Joel C. This book presents the first detailed discussion on the role of the geological sciences geosciences community in the implementation of the SDGs. Unlike traditional geosciences textbooks, it is structured according to development priorities framed in the context of the 17 SDGs.
