Meier, 1984 Now in its seventh edition *Leading Issues in Economic Development* introduces a new co author James E Rauch Maintaining the unique structure that the book has established over the last 35 years Rauch has revised and updated this seventh edition to strengthen the analytical and quantitative dimensions and to clarify contemporary and future problems of development policy The co authors integrate the most insightful materials in this wide ranging field offering students the opportunity to experience a variety of perspectives while helping them to keep sight of overarching themes This edition adds two new chapters Income Distribution and Development and the Environment It also now consolidates several chapters and increases the number of selections from leading professional journals In this edition both the selections and the authors own overviews notes comments and exhibits make greater use of empirical analysis as well as modern economic theory In all *Leading Issues in Economic Development* provides fresh and serious attention to the interplay between development experience changing views of economists and policy      **Urbanization and Socio-Economic Development in Africa** Steve Kayizzi-Mugerwa, Abebe Shimeles, Nadège Désirée Yaméogo, 2014-05-16 The main goal of this book is to put urbanization and its challenges squarely on Africa's development agenda Planned urbanization can improve living conditions for the majority help in the expansion of the middle class and create conditions for

economic transformation However many African cities have developed haphazardly resulting in the decline of public services in slum proliferation and increases in poverty African cities thrive on activities characterized by easy entry and low productivity generally referred to as the informal sector Indeed today some urban dwellers are poorer than their cousins in the countryside In spite of reform attempts many governments have not been able to create an enabling environment with adequate infrastructure and institutions to sustain markets for easy exchange and production This study argues that with careful policies and planning the situation can be changed If the recent natural resource led economic boom that we have seen in many African countries is used for structural reforms and urban renewal African cities could become centers of economic opportunity The challenge for African policymakers is to ensure that urban development is orderly and that the process is inclusive and emphasizes the protection of the environment hence green growth
