Prichard, 2006 The second edition in Java of the classic Walls and Mirrors approach to programming designs solutions to problems using both data abstraction the walls and recursion the Mirrors Data Abstraction and Problem Solving with Java Walls and Mirrors 2 provides a focus on the important concepts of data abstraction and data structures in a way that beginning programmers find accessible The first part of the book covers problem solving techniques including a review of Java fundamentals principles of programming and software engineering recursion and data abstraction and linked lists Later chapters focus on problem solving with abstract data types including stacks queues algorithm efficiency and sorting trees and graphs This edition contains enhanced material on OO implementation MARKET Readers searching for problem solving solutions through abstraction algorithmic refinement data structures and recursion [ARCHIVED: Pooled JVM in CICS Transaction Server V3](#) Chris Rayns, George Burgess, Scott Clee, Tom Grieve, John Taylor, Yun Peng Ge, Guo Qiang Li, Qian Zhang, Derek Wen, IBM Redbooks, 2015-06-17 NOTE This book contains information about technologies that have been superseded and it is retained for historical purposes only IBM CICS Transaction Server CICS TS has supported the deployment of Java applications since the 1990's In CICS TS V1.3 1999 IBM introduced the Pooled JVM style of JVM infrastructure within CICS TS This infrastructure was designed to be similar in nature to that which a CICS application developer for a language such as COBOL would be used to It brought the benefits of the new Java language to CICS TS without a dramatic change to the way CICS users thought of core concepts such as re-entrancy and isolation As enterprise usage of Java evolved it began to make more and more use of multi-threaded environments where isolation was not a desired

characteristic Additionally technologies such as OSGi Open Service Gateway Initiative evolved to overcome some of the original disadvantages of applying Java to an enterprise environment As such the limitations of the Pooled JVM approach began to outweigh the benefits In CICS TS V4 1 2009 IBM introduced the new JVM server infrastructure in CICS TS as a replacement to the Pooled JVM approach This JVM server infrastructure provides a much more standard Java environment that makes the writing and porting of Java applications for CICS TS much simpler In CICS TS V5 1 2012 support for the old Pooled JVM infrastructure was removed While there is a relatively simple migration path from Pooled JVM to JVM server applications should no longer be written to the Pooled JVM infrastructure There are a number of more recent IBM Redbooks publications covering the replacement JVM server technology including IBM CICS and the JVM server Developing and Deploying Java Applications SG24 8038 A Software Architect s guide to New Java Workloads in IBM CICS Transaction Server SG24 8225
