Granvil Dean Treece, Joe M. Fox

Prawn Hatchery :

Freshwater Prawn Farming Michael B. New, 1982 This book has been prepared on the basis of Thai experience in the farming of the giant freshwater prawn *Macrobrachium rosenbergii*. It has a practical orientation as it was written for extension and fishery officers as well as for practising aquaculturists willing to start freshwater prawn farming. The farming of this prawn is of recent origin but is spreading very rapidly in several countries which followed the well divulged example of Hawaiian prawn farmers. At the time in which this manual was written Thailand had taken the world leadership in terms of production as the result of an active long term involvement of both the official and private sectors. Since there is already a great deal of mainly scientific literature on this species this manual was conceived to fill a gap in the existing literature in order to provide information on how to go about *M. rosenbergii* farming answering the numerous requests from member Governments to FAO. It contains some general information on the biology of the species and much more detailed information on larval rearing and pond culture. The Thai practice forms the core of the manual but reference to other alternative techniques used elsewhere is given as well as additional literature reference relevant to each topic dealt with in the text for readers willing to enlarge their knowledge. Annexes on water filtration nutrition of larvae description of the various larval stages ponds feeds seine set design stock estimation and management strategy for Continuous culture technique are also provided as well as a glossary of scientific and technical terms used in the main text.

Design, Operation and Training Manual for an Intensive Culture Shrimp Hatchery Granvil Dean Treece, Joe M. Fox, 1999-06 Covers two species *Penaeus monodon* and *Penaeus vannamei* It is organized into three main parts Design Operation and Training The design part focuses on two hatcheries and gives detailed plans of their construction as well as other options The operation portion of the manual details the procedures for most efficient operation of a specific hatchery

This manual consists of compiled presently known information important for training new personnel. It contains enough detail to provide the newcomer with knowledge to run a hatchery and provides details to assist the experienced hatchery manager. Illustrated **Freshwater Prawn Farming** Michael B. New, Somsuk Singholka, Food and Agriculture Organization of the United Nations, 1985 *Giant Freshwater Prawn Hatchery, Vung Tau, Viet Nam* Interim Committee for Coordination of Investigations of the Lower Mekong Basin, 1981 **A Guide to Prawn Hatchery Design and Operation** Nicanor G. Primavera, 1984 **Assessment of Freshwater Fish Seed Resources for Sustainable Aquaculture** Food and Agriculture Organization of the United Nations, 2007-01-01

Four of the most important resources to aquaculture outside human and technological resources are land, water, seed, and feed. Efficient use of these resources are necessary to guarantee optimum production from aquaculture. A project study and analysis of seed production in small scale rural aquaculture was implemented through a desk study and expert workshop held in Wuxi, China from 23-26 March 2006 to assess the status of freshwater fish seed resources and supply and its contribution to sustainable aquatic production. This publication is presented in two parts. Part 1 contains the proceedings and major recommendations of the expert workshop which tackled three major themes: a) seed quality, genetics, technology and certification; b) seed networking, distribution, entrepreneurship and certification; and c) how rural fish farmers can benefit from the freshwater aquaculture sector. Part 2 contains the detailed outcomes of the desk study consisting of three regional syntheses: Africa, Asia, and Latin America based on 21 country case studies; five thematic reviews: quality, genetics, and breeding; seed networks and entrepreneurship; seed supply in rural aquaculture; farmer innovations and women involvement; and three invited papers: self-recruiting species, decentralized seed networking in Bangladesh, and establishment of national broodstock centres in Viet Nam.

Shrimp and Prawn Farming in the Western Hemisphere Joe A. Hanson, Harold Leland Goodwin, 1977. *Of the Discussions and Proceedings of Two Workshops Held in Galveston, Tex. Oct 8-11 1975 and in Charleston, S.C. June 14-15 1976* *Farming Freshwater Prawns* Michael B. New, Food and Agriculture Organization of the United Nations, 2002-01-01. This manual is an up-to-date practical guide to the farming of *Macrobrachium rosenbergii*. Many of the techniques described are also applicable to the culture of other species of freshwater prawns. The principle target audience is farmers and extension workers, but it is also hoped that it will be useful for aquaculture lecturers and students. After a preliminary section on the biology of freshwater prawns, the manual covers site selection for hatcheries, nurseries, and grow-out facilities, and the management of the broodstock hatchery, nursery, and grow-out phases of rearing. Harvesting and post-harvest handling are also covered, and there are some notes on marketing freshwater prawns. The reference and bibliography section contains a list of relevant reviews, as well as other manuals on general aquaculture themes such as water and soil management, topography, pond construction, and simple economics. The management principles described are illustrated by photographs and drawings. The manual contains annexes on specific topics such as the production of larval feeds, size variation, and stock estimation. The final annex is a glossary that

lists not only the terms used in the manual itself but also those which may be found in other documents FAO Fisheries Technical Paper ,2003 This report synthesizes the findings of ten case studies published in FAO Fisheries Technical Paper 426 2 The case studies have been conducted in five medium sized lakes in the Democratic Republic of the Congo Malawi Zambia and Zimbabwe The synthesis focuses on three features relevant for the SADC region How has fishing effort developed in these lakes over the last 50 years What causes changes in fishing effort How do fishing effort and environmental factors compare in their effects on the regeneration of fish stocks *Design, Operation and Training Manual for an Intensive Culture Shrimp Hatchery (with Emphasis on Penaeus Monodon and Penaeus Vannamei)* Granvil Dean Treece, Joe M.
