Wintergirls:

From Text to Epitext Shelbie Witte, Melissa Gross, Don Latham, 2021-03-02 This volume explains how analyzing textual elements that aren't part of the text but connected to it can be used with K-16 students to improve comprehension, engagement, critical thinking, and media literacy. Beginning with an introduction that briefly explains Genette's theory of paratext and discusses the functions of epitext, this book comprises theory-to-practice chapters that showcase ways in which teachers and librarians can use elements independent of a text to discuss texts and media with students. Chapters include a practitioner's section specifying practical approaches and explanations for how to use epitext. Scaffolding an application of theory to practice, this title provides educators with an original approach to increasing literacy engagement and integration, as well as for increasing media literacy and critical thinking. It includes practical ideas for using epitext in the classroom to promote critical thinking and for collaboration between teachers and librarians. It also includes editorial sidebars that provide additional ideas, support deep thinking, make connections to relevant content in other chapters, and provide examples for students in K-16 classrooms.

Preventing Harmful Behaviour in Online Communities Zoe Alderton, 2022-04-11 Preventing Harmful Behaviour in Online Communities explores the ethics and logistics of censoring problematic communications online that might encourage a person to engage in harmful behaviour. Using an approach based on theories of digital rhetoric and close primary source analysis, Zoe Alderton draws on group dynamics research in relation to the way in which some online communities foster negative and destructive ideas, encouraging community members to engage in practices including self-harm, disordered eating, and suicide. This book offers insight into the dangerous gap between the clinical community and caregivers versus the pro-anorexia and pro-self-harm communities, allowing caregivers or medical professionals to understand hidden online communities young people in their care may be part of. It delves into the often unanticipated needs of those who band together to resist the healthcare community, suggesting practical ways to address their concerns and encourage healing. Chapters investigate the alarming ease with which ideas of self-harm can infect people through personal contact, community unease, or even fiction and song, and the potential of the internet to transmit self-harmful ideas across countries and even periods of time. The book also outlines the real nature of harm-based communities online, examining both their appeal and dangers while also examining self-censorship and intervention methods for dealing with harmful content online. Rather than pointing to punishment or censorship as best practice, the book offers constructive guidelines that outline a more holistic approach based on the validity of expressing negative mood and the creation of safe peer support networks, making it ideal reading for professionals protecting vulnerable people as well as students and
