2000 T. Uomoto,2000-03-31 The first international symposium on NDT CE Non Destructive Testing in Civil Engineering was held in Berlin Germany in 1991 Successive symposia were held throughout Europe until 1997 This the 5th symposium is organized as SEIKEN SYMPOSIUM No 26 and is sponsored by the Institute of Industrial Science at the University of Tokyo Japan Original objectives of the NDT CE symposium have been to provide an opportunity for discussing current issues and future perspectives of NDT and for promoting mutual understanding among engineers and researchers Asia is one of the key regions for further development in NDT and this symposium in Japan will be a good opportunity not only to exchange technical information on NDT but to promote worldwide friendship between engineers in Asian countries and other nations of the world This volume contains 70 papers providing the most recent research results and findings The papers are grouped under the following areas 1 keynote papers 2 magnetic electric 3 steel structures 4 integrated test 5 moisture 6 strength 7 acoustic emission 8 various tests 9 ultrasonic 10 impact echo 11 radar 12 quality and 13 corrosion cover *Non-destructive Testing and Evaluation of Civil Engineering Structures* Jean-Paul Balayssac,Vincent Garnier,2017-11-22 The non destructive evaluation of civil engineering structures in reinforced concrete is becoming an increasingly important issue in this field of engineering This book proposes innovative ways to deal with this problem through the characterization of concrete durability indicators by the use of non destructive techniques It presents the description of the various non destructive techniques and their combination for the evaluation of indicators The processing of data issued from the combination of NDE methods is also illustrated through examples of data fusion methods The identification of conversion models linking observables obtained from non destructive measurements to concrete durability indicators as well as the consideration of different sources of variability in the assessment process are also described An analysis of in situ applications is carried out in order to highlight the practical aspects of the methodology At the end of the book the authors provide a methodological guide detailing the proposed non destructive evaluation methodology of concrete indicators Presents the latest developments performed in the community of NDT on different aspects Provides a methodology developed in laboratory and transferred onsite for the evaluation of concrete properties which are not usually addressed by NDT methods Includes the use of data fusion for merging the measurements provided by several NDT methods Includes examples of current and potential applications
