A New Theory of Market and Capitalism Anatoliy Zhelezniak,2021-11-12 This book presents a new theory of market and capitalism detailing its key moments and general logic It is based on the distinction between two market types the simple commodity market and the capitalist one In contrast to what is usually uncritically accepted disequilibrium and imperfect competition are admitted here to be a functional norm of the capitalist market The book also shows that equilibrium and perfect competition are admitted to be a functional anomaly with crises considered as the result of such an anomaly It details the general principles and concrete measures of crisis proof policies and behavior

Better Economics for the Earth: A Lesson from Quantum and Information Theories Quan-Hoang Vuong,Minh-Hoang Nguyen,2024-07-21 Learning from the quantum and information theories we provide a new definition of value which is expected to help economists relax assumptions and loosen established economic principles in order to change and evolve The new definition is also expected to enable social scientists to address newly arising phenomena or events that are not accounted for by existing value systems such as environmental crises artificial intelligence AI and interdisciplinary information more proactively and productively We hope that by incorporating the quantum physics perspective into the interpretation of information and value social scientists particularly economists will offer more reliable predictions and advice for societal transitions toward sustainability Hanoi July 21 2024
