Earthquake Engineering for Concrete Dams National Research Council, Division on Engineering and Physical Sciences, Commission on Engineering and Technical Systems, Division of Natural Hazard Mitigation, Committee on Earthquake Engineering, Panel on Earthquake Engineering for Concrete Dams, 1991-02-01 The hazard posed by large dams has long been known Although no concrete dam has failed as a result of earthquake activity there have been instances of significant damage Concerns about the seismic safety of concrete dams have been growing recently because the population at risk in locations downstream of major dams continues to expand and because the seismic design concepts in use at the time most existing dams were built were inadequate In this book the committee evaluates current knowledge about the earthquake performance of concrete dams including procedures for investigating the seismic safety of such structures Earthquake Engineering for Concrete Dams specifically informs researchers about state of the art earthquake analysis of concrete dams and identifies subject areas where additional knowledge is needed

Economics of Sustainable Agriculture Koichi Kuriyama, 2025-03-28 Fertilizers are indispensable for agricultural production Chemical fertilizers have significantly improved agricultural productivity However the excessive use of fertilizers has caused serious nitrogen pollution What is the reason of a lack of progress in addressing nitrogen pollution What is necessary to achieve sustainable nitrogen use in agriculture This book provides a new perspective from an economic standpoint on these questions Firstly we propose the non market valuation methods to evaluate the social costs of nitrogen

Because nitrogen control requires considerable effort and cost evaluating the costs and benefits of nitrogen measures in monetary terms allows for a comparison of the expenses and benefits of nitrogen control despite the delays in implementing such measures in the agricultural sector Secondly we analyze the behavioral changes of producers and consumers regarding nitrogen to indicate the direction of agricultural environmental policies for sustainable nitrogen use in the future To achieve sustainable nitrogen use farmers and consumers need to adopt production and consumption behaviors that consider nitrogen By analyzing the effects of visualizing the nitrogen footprint on the behavioral changes of farmers and consumers this book not only highlights the limitations of conventional agricultural policies but also provides recommendations for future agricultural environmental policies
