The Routledge Handbook of Second Language Acquisition and Language Testing Paula Winke, Tineke Brunfaut, 2020-12-27 This Handbook with 45 chapters written by the world's leading scholars in second language acquisition (SLA) and language testing dives into the important interface between SLA and language testing shared ground where researchers seek to measure second language performance to better understand how people learn their second languages. The Handbook also reviews how to best measure and evaluate the second language L2 learners' personal characteristics, backgrounds, and learning contexts to better understand their L2 learning trajectories. Taking a transdisciplinary approach to research, the book builds upon recent theorizing and measurement principles from the fields of applied linguistics, cognitive science, psychology, psycholinguistics, psychometrics, educational measurement, and social psychology. The Handbook is divided into six key sections: 1. Assessment concepts for SLA researchers; 2. Building instruments for SLA research; 3. Measuring individual differences; 4. Measuring language development; 5. Testing specific populations; and 6. Measurement principles for SLA researchers.

**Reflecting on the Common European Framework of Reference for Languages and its Companion Volume** David Little, Neus Figueras, 2022-03-02 The Common European Framework of Reference for Languages (CEFR) and its Companion Volume have established themselves as an indispensable reference point for all aspects of second and foreign language education. This book discusses the impact of the CEFR on curricula, teaching, learning, and assessment in a wide range of educational contexts, identifies challenges posed by the Companion Volume, and sheds light on areas that require further research and development. Particular attention is paid to three features of the two documents: their action-oriented approach, their focus on plurilingualism, and the potential of their scales and descriptors to support the alignment of curricula, teaching, learning, and assessment. The book suggests a way forward for future engagement with the CEFR, taking account of new developments in applied linguistics and related disciplines.

This approach gives the traveler responsibility for learning in real interaction situations with immediate feedback. Examples of topics covered include benchmarks for evaluation, selection, communication with and compensation for a mentor, hints for increasing interaction opportunities, language structures, nuance, and word
