Wheeler, 2007 No mission too difficult no sacrifice too great Duty First For almost a century from the Western Front of World War I to the deserts of Iraq this motto has spurred the soldiers who wear the shoulder patch bearing the Big Red One In this first comprehensive history of America's 1st Infantry Division James Scott Wheeler chronicles its major combat engagements and peacetime duties during its legendary service to the nation The oldest continuously serving division in the U S Army the Fighting First has consistently played a crucial role in America's foreign wars It was the first American division to see combat and achieve victory in World War I and set the standard for discipline training endurance and tactical innovation One of the few intact divisions between the wars it was the first army unit to train for amphibious warfare During World War II the First Division spearheaded the invasions of North Africa and Sicily before leading the Normandy invasion at Omaha Beach and fighting on through the Hurtgen Forest the Battle of the Bulge the Ruhr Pocket and deep into Germany By war's end it had developed successful combined arms regimental combat teams and made advances in night operations Wheeler describes the First Division's critical role in postwar Germany and as the only combat division in Europe during the early Cold War After returning to the United States at Fort Riley Kansas the division fought valiantly in Vietnam for five trying years successfully protecting Saigon from major infiltration along Highway 13 while pioneering air mobile operations It led the liberation of Kuwait in Desert Storm and kept an uneasy peace in Bosnia and Kosovo Along the way Wheeler illuminates the division's organizational evolution its consistently remarkable commanders and leaders and its equally remarkable soldiers Meticulously detailed and engagingly written *The Big Red One* nimbly combines historical narrative with astute analysis of the unit's successes and failures so that its story reflects the larger chronicle of America's military experience over the past century

The Commercial and Financial Chronicle, 1922 America's Space Sentinels Jeffrey Richelson, 1999 During much of the Cold War America's first line of defense was in outer space a network of secret satellites that could provide instant warning of an enemy missile launch The presence of these infrared sensors orbiting 22 000 miles above the earth discouraged a Soviet first strike and stabilized international relations between the superpowers and they now play a crucial role in monitoring the missile programs of China India and other emerging nuclear powers Jeffrey Richelson has written the first comprehensive history of this vital program tracing its evolution from the late 1950s to the present He puts Defense Support Program operations in the context of world events from Russian missile programs to the Gulf War and explains how DSP's infrared sensors are used to detect meteorites monitor forest fires and even gather industrial intelligence by seeing the lights of steel mills
