An analysis** ,2021-09-16 Bachelor Thesis from the year 2019 in the subject Business economics Controlling grade 1 7 University of Applied Sciences Stuttgart language English abstract This thesis deals with the questions whether there is a correlation between strategies and financial Key Performance Indicators KPIs and how their mutual interdependence developed over time The author wants to find out if the KPIs are changed if the strategy is changed consequently and if that change again affects the KPIs Therefore this work selectively focuses on the evaluation of annual reports between 2009 and 2018 and the development and application of an adjusted Balanced Score card BSC through the further investigation of its financial perspective Key figures make a significant contribution to the management of organisations as they create transparency by providing information about the corporate performance and the progress towards its stated goals its strategy Indicators and strategies seem inevitably linked so that they lose their meaning or significance with out each other Due to a study on key performance indicators of PwC in the year 2017 in Luxembourg with over 40 executives surveyed only 45 % of respondents believed their key performance indicators monitor the performance of long term strategic goals and 31 % are not clearly aware of the link between their KPIs and their long term strategy Those are alarming numbers Often companies use too many outdated or even too few KPIs and the progress of the company s KPIs towards its strategic objectives is not regularly updated and communicated to the staff and workforce A lack of information makes the general

company performance be the main reason for the executives for monitoring KPIs The need for change is known as 52 % of the executives surveyed see a need for improvement of their currently followed set of KPIs One of the challenges which affected the companies surveyed within their KPI process including a lack of standardised processes across the industry is the unclear business strategy and the KPIs irrelevancy towards the existing business strategy itself This arises the question how target oriented do German companies align their KPIs and how much do they depend on the corporate strategy Is there a correlation definition the reason why the strategy reference does not become clear and should the KPIs be adapted or even changed in the long term Which strategy leads to which KPIs and which value drivers influence them **New Approaches**
