Binding And Kinetics For Molecular Biologists:

Binding and Kinetics for Molecular Biologists James Andrew Goodrich, Jennifer F. Kugel, 2007 This handbook offers a practical guide to the principles of quantitative analysis in biological experiments The material is primarily aimed at working molecular biologists but the scope and clarity of presentation make it equally suitable as an introduction for students Topics covered range from the basics such as measuring the concentrations of macromolecules through considerations of binding constants and the kinetics of molecular interactions The book ends with a thorough consideration of data analysis

Therapeutic Monoclonal Antibodies Zhiqiang An, 2011-09-20 70 chapter authoritative reference that covers therapeutic monoclonal antibody discovery development and clinical applications while incorporating principles experimental data and methodologies First book to address the discovery and development of antibody therapeutics in their entirety Most chapters contain experimental data to illustrate the principles described in them Authors provide detailed methodologies that readers can take away with them and use in their own laboratories

The Journal of Cell Biology, 2006 No 2 pt 2 of November issue each year from v 19 1963 47 1970 and v 55 1972 contain the Abstracts of papers presented at the Annual Meeting of the American Society for Cell Biology 3d 1963 10th 1970 and 12th 1972

Emerging Model Organisms David A. Crotty, Alexander Gann, 2009 In this volume leading experts provide chapters on 23 emerging model systems ranging from bat and butterfly to cave fish and choanoflagellates cricket and finch to quail snail and tomato

Emerging Model Organisms, 2009 Until recently a small number of model organisms has been the focus of most research in molecular cellular and developmental biology But in the last few years due in part to increased interest in questions of evolution technical advances in selectively altering gene expression patterns and reduced costs of genome sequencing the range of organisms used for research is greatly expanding Emerging Model Organisms Volume 1 introduces the reader to this new generation of model organisms providing a diverse catalog of potential species useful for extending research in new directions In this volume leading experts provide chapters on 23 emerging model systems ranging from bat and butterfly to cave fish and choanoflagellates cricket and finch to quail snail and tomato Subsequent releases of the Emerging Model Organisms series already in preparation will focus on additional species

Biomedical Optical Instrumentation and Laser-Assisted Biotechnology A.M. Verga Scheggi, S. Martellucci, Arthur N. Chester, R. Pratesi, 1996-08-31 The NATO Advanced Study Institute Biomedical Optical Instrumentation and Laser Assisted Biotechnology was held November 10 22 1995 in Erice Sicily This was the 19th conference organized by the International School of Quantum Electronics under the auspices of the Ettore Majorana Center for Scientific Culture The contributions presented at the Institute are written as extended review like papers to provide a broad and representative coverage of the fields of laser techniques optoelectronics systems for medical diagnosis and light and laser applications to Biology and Medicine The aim of the Institute was to bring together some of the world's

acknowledged scientists and clinicians that belong to different disciplines and consequently do not usually meet but who have as a common link the use of optoelectronics instrumentation techniques and procedures Most of the lecturers attended all the lectures and devoted their spare hours to stimulating discussions We would like to thank them all for their admirable contributions The Institute also took advantage of a very active audience most of the participants were active researchers in the field and contributed with discussions and seminars Some of these seminars are also included in these Proceedings The Institute was an important opportunity to discuss latest developments and emerging perspectives on the use of laser sources and optoelectronic techniques for diagnostic and therapeutic purposes

Genetic Variation Michael P. Weiner, Stacey B. Gabriel, J. Claiborne Stephens, 2007 *Genetic Variation A Laboratory Manual* is the first compendium of protocols specifically geared towards genetic variation studies and includes thorough discussions on their applications for human and model organism studies Intended for graduate students and professional scientists in clinical and research settings it covers the complete spectrum of genetic variation from SNPs and microsatellites to more complex DNA alterations including copy number variation Written and edited by leading scientists in the field the early sections of the manual are devoted to study design and generating genotype data the use of resources such as HapMap and dbSNP as well as experimental statistical and bioinformatic approaches for analyzing the data The final sections include descriptions of genetic variation in model organisms and discussions of recent insights into human genetic ancestry forensics and human variation

Untangling the Double Helix James C. Wang, 2009 The problem of unraveling two intertwined strands during the duplication of DNA was recognized shortly after the proposal of the DNA double helix structure in 1953 A group of enzymes called DNA topoisomerases solve this problem by breaking and rejoining DNA molecules in a controlled manner thereby allowing strands to be passed through each other and thus untangled not just during DNA replication but also during many other basic cellular processes Because of their intimate involvement in the workings of the cell topoisomerases are also the logical targets of many antibiotics including Cipro and anticancer agents This book written by James Wang the discoverer of the first topoisomerase and a leader in the field since presents ten chapters covering the historical backdrop of the DNA entanglement problem and the discovery of the DNA topoisomerases how DNA topoisomerases perform their magic in DNA replication transcription genetic recombination and chromosome condensation and how they are targets of therapeutic agents The book should appeal to readers from undergraduates upwards with interests in the biological and clinical aspects of topoisomerase function or in the mathematics and physics of topology

Central Regulation of Autonomic Functions Arthur D. Loewy, K. Michael Spyer, 1990-06-07 This unique text relates the dramatic advances of modern neurobiology to our understanding of the structure and function of the autonomic nervous system providing a clear view of the central neuronal components involved in autonomic control The scope is wide ranging from anatomical pathways and molecular pharmacology

to the perceptual qualities of autonomic sensation and their potential in modifying behavior Essential background information is reviewed and the most recent research discussed in a readable informative manner The text is richly illustrated The first six chapters offer a comprehensive review of the system s anatomy physiology and pharmacology emphasizing the organization and control of the autonomic preganglionic neurons and the complexity of central pathways Later chapters review the autonomic control of cardiovascular sexual urinary endocrine and other functions Written by an international group of distinguished scientists this work is a valuable resource for clinicians scientists and graduate students in the fields of anatomy physiology pharmacology and neuroscience

Integrated Drug Discovery Technologies

Houng-Yau Mei,Anthony W. Czarnik,2002-03-19 Integrated Drug Discovery Technologies provides a global overview of emerging drug development technologies by presenting and integrating new techniques from the disciplines of chemistry biology and computational sciences It combines integration of contemporary mechanization with strategies in drug delivery Topics include target identification and validation functional genomics microfabrication techniques integrated proteomics technologies high throughput screening fluorescence correlation spectroscopy methods and screening lead compounds in the post genomic era
