It provides a wealth of data not only from many Indian languages belonging to the primary language families present in the country: Indo-Aryan, Dravidian, Austro-Asiatic, and Tibeto-Burman, but also from the endangered languages of the Tai-Kadai family of Assam and the Greater Andamanese family. The author gives a holistic view of the linguistic landscape of India and fills a significant gap in the study of the lesser-known languages of South Asia. This volume will be an excellent resource for students and researchers of Indian languages, cultural studies, South Asian studies, and all branches of linguistics.
