Chemical Week ,1981

Rubber Technology John S. Dick,2020-10-12 Rubber Technology Compounding and Testing for Performance is a practical guide to cost effective formulating of rubber compounds to achieve optimal processing and performance It provides a thorough discussion of the principles of rubber compounding rubber testing and how various compound changes affect different properties and test measurements Rubber compounding is discussed as a series of interdependent systems such as the elastomer system the filler oil system the cure system among others A holistic approach is used to show how changes in these different systems will affect specific compound properties Much attention is given to tradeoffs in properties and emphasis is placed on finding the best balance for compound cost processing properties and product performance New in this third edition is the updated and extended section on silicone elastomers as well as the significantly expanded and newly written chapters on recycled rubber and precipitated silica and non black fillers

Essential Rubber Formulary: Formulas for Practitioners Chellappa Chandrasekaran,2007-03-22 The author a seasoned rubber technologist of four decades provides more than 180 essential rubber formularies some of which have never been published that are used by practitioners the world over on a frequent basis A special feature of the formulations is that they are designed for factory scale applications The opening chapter of this indispensable book gives practical information on compounding techniques coloring ingredients as well as a whole section on typical rubber testing methods The book concludes with appendices useful for the technologist that include seven conversion tables and three tables on scorching of rubber specific gravity and volume cost equivalent chemical names for trade names Designing a rubber formula on the factory floor demands knowledge of the whole undertaking such as the physical nature of ingredients the interaction of additives and the base rubber during compounding and processing as well as making sure that the finished product conforms to specification and requirements This book provides all the necessary knowledge for practitioners and students alike

Rubber Compounding Ingredients: Need, Theory and Innovation C. Hepburn,1997 The objectives of rubber compounding may be essentially defined as providing optimised performance and processability generally at minimum cost by the incorporation of non rubber ingredients

Optimised performance in this context refers not only to mechanical properties but also for example resistance to bacteria or particular chemicals In some applications a rubber may also need to be coloured or bonded to another material and further ingredients may be required For many years rubber compounding was largely empirical and frequently described as a black art Today it is practised predominantly on the basis of scientific principles elucidated over years of study and is still the subject of intensive research In this new report Claude Hepburn reviews the following range of compounding ingredients considering the range of materials available their particular actions and recent interesting advances Process and extender oils Process aids and surfactants Coupling agents and adhesion promoters Fire retardants bactericides and blowing agents colourants and odourants An additional indexed section containing several hundred abstracts from the Polymer Library provides many more examples of novel materials and their applications
