Phenomenon I. D. McClain, 2013-03 This book is a mathematical and scientific portrayal of the creation of the physical universe We examine all the details of forming a neutron the atoms the earth and the galaxies as related to the Torah Unlike most creation science books that biologically attack evolution or focus in on the flood or the big bang theory we build the entire universe from scratch namely nothing After building the microcosm we build the macrocosm and the earth We only touch biology from the standpoint of transition from before and after the fall After structuring the initial universe and earth we examine all the cataclysmic activity that formulates the world as we know it today Truly the reverence for Elohim is the beginning of knowledge and the Torah a light to follow for understanding The reverence for Elohim is like deciding to look at the map for directions The Torah is like the images on the map The Ruach HaKodesh Holy Spirit gives us the ability to understand the images that we see on the map Have you ever wondered how plants survive after Elohim created them before there was a sun to divide day from night Or did you just decide that the whole idea is impossible
