Introduction to Optimization fills the need for an accessible yet rigorous introduction to optimization theory and methods featuring innovative coverage and a straightforward approach. The book begins with a review of basic definitions and notations while also providing the related fundamental background of linear algebra, geometry, and calculus. With this foundation, the authors explore the essential topics of unconstrained optimization problems, linear programming problems, and nonlinear constrained optimization. In addition, the book includes an introduction to artificial neural networks, convex optimization, multi-objective optimization, and applications of optimization in machine learning. Numerous diagrams and figures found throughout the book complement the written presentation of key concepts, and each chapter is followed by MATLAB exercises and practice problems that reinforce the discussed theory and algorithms. The Fifth Edition features a new chapter on Lagrangian nonlinear duality, expanded coverage on matrix games, projected gradient algorithms, machine learning, and numerous new exercises at the end of each chapter. An Introduction to Optimization includes information on the mathematical definitions, notations, and relations from linear algebra, geometry, and calculus used in optimization. Optimization algorithms covering one-dimensional search, randomized search, and gradient, Newton, conjugate direction, and quasi-Newton methods. Linear programming methods covering the simplex algorithm, interior point methods, and duality. Nonlinear constrained optimization covering theory and algorithms, convex optimization, and Lagrangian duality. Applications of optimization in machine learning, including neural network training, classification, stochastic gradient descent, linear regression, logistic regression, support vector machines, and clustering. An Introduction to Optimization is an ideal textbook for a one or two semester senior undergraduate or beginning graduate course in optimization theory and methods.
