

- The operation of power system must be reliable and uninterrupted.
- The reliability of power system implies more than availability of power.
- The loads must be fed at constant voltage and frequency.
- Electrical areas are large in size. So planning for future expansion of a power system is essential.
- More network data must be collected for planning a power system network.
- For planning of power system; power system engineers use computer programming.
- Importance of power system planning and operational analysis covers the maintenance of generation, transmission and distribution facilities.
