Lessons in Teaching Computing in Primary Schools James Bird, Helen Caldwell, Peter Mayne, 2014-07-18. Lesson planning in line with the new Primary National Curriculum. This book goes much further than explaining to teachers the knowledge that the new computing curriculum requires. It is about teaching and learning rather than simply teaching computing as an academic subject. The new computing curriculum is explored in manageable chunks, and there is no scary language; everything is explained clearly and accessibly. You will find example lesson plans alongside every element of the curriculum as support and inspiration when planning your own lessons. It inspires an approach to teaching computing that is about creativity and encouraging learners to respond to challenges and problems using technology as a tool. Ideas for taking the lesson further, assessment, and reflective questions.
