

More Confidence Interval Problem Answers

A statistics professor asked her students whether or not they were registered to vote. In a sample of 50 of her students (randomly sampled from her 700 students), 35 said they were registered to vote.

1. Find a 95% confidence interval for the true proportion of the professor's students who were registered to vote. (Make sure to check any necessary conditions and to state a conclusion in the context of the problem.)

We have a random sample of less than 10% of the professor's students, with 35 expected successes (registered) and 15 expected failures (not registered), so a Normal model applies.

$$n = 50, \hat{p} = \frac{35}{50} = 0.70, \hat{q} = 1 - \hat{p} = 0.30, \text{ so } SE(\hat{p}) = \sqrt{\frac{\hat{p}\hat{q}}{n}} = \sqrt{\frac{(0.70)(0.30)}{50}} = 0.065$$

Our 95% confidence interval is:

$$\hat{p} \pm z^* SE(\hat{p}) = 0.70 \pm 1.96(0.065) = 0.70 \pm 0.127 = 0.573 \text{ to } 0.827$$

We are 95% confident that between 57.3% and 82.7% of the professor's students are registered to vote.

2. Explain what 95% confidence means in this context.

If many random samples were taken, 95% of the confidence intervals produced would contain the actual percentage of the professor's students who are registered to vote.

3. What is the probability that the true proportion of the professor's students who were registered to vote is in your confidence interval?

There is no probability involved—once the interval is constructed, the true proportion of the professor's students who were registered to vote is in the interval or it is not.

4. According to a September 2004 Gallup poll, about 73% of 18- to 29-year-olds said that they were registered to vote. Does the 73% figure from Gallup seem reasonable for the professor's students? Explain.

The 73% figure from Gallup seems reasonable since 73% lies in our confidence interval.

5. If the professor only knew the information from the September 2004 Gallup poll and wanted to estimate the percentage of her students who were registered to vote to within $\pm 4\%$ with 95% confidence, how many students should she sample?

$$\begin{aligned} ME &= z^* \sqrt{\frac{\hat{p}\hat{q}}{n}} \\ 0.04 &= 1.96 \sqrt{\frac{(0.73)(0.27)}{n}} \\ n &= \frac{1.96^2 (0.73)(0.27)}{0.04^2} = 473.24 = 474 \end{aligned}$$

Note: Since there are only 700 students in the professor's class, she cannot sample this many students without violating the 10% condition!

Ap Statistics Quiz A Chapter 19

**Daren Starnes, David S. Moore, Dan
Yates, Josh Tabor**

Ap Statistics Quiz A Chapter 19:

Business Statistics J. K. Sharma, 2006 The second edition of Business Statistics continues to retain the clear crisp pedagogy of the first edition It now adds new features and an even stronger emphasis on practical applied statistics that will enhance the text s ability in developing decision making ability of the reader In this edition efforts have been made to assist readers in converting data into useful information that can be used by decision makers in making more thoughtful information based decisions

Basic Statistics for the Behavioral Sciences Robert M. Thorndike, Dale L. Dinnel, 2001 Meant for a first course in Statistics offered to students in Education Psychology and other Behavioral Sciences Written by one of the most recognizable names in the discipline Basic Statistic for the Behavioral Sciences discusses statistics in the context of educational and psychological research making a typically abstract subject more meaningful to readers The text helps readers develop a conceptual understanding of statistics above and beyond computation by providing numerous real life examples and ample opportunities for students to check review and apply their learning
