Structure is a powerful BIM program that supports the ability to coordinate update and share design data with team members throughout the design construction and management phases of a building's life. A key component in managing the BIM process is to establish a company foundation for different types of projects by creating standard templates and custom family elements. Having this in place makes the process of any new project flow smoothly and efficiently. The objective of the Autodesk Revit 2017 R1 BIM Management Template and Family Creation student guide is to enable users who have worked with the software to expand their knowledge in setting up office standards with templates that include annotation styles, preset views, sheets, and schedules, as well as creating custom system in place and component families. This student guide contains practices that are specific to each discipline.

**Topics Covered:** Create custom templates with annotation styles, title blocks, and custom element types; Create schedules including material takeoff schedules with formula; Create custom wall, roof, and floor types, as well as MEP system families; Set up a component family file with a parametric framework; Create family geometry; Create family types; Modify the visibility of components and incorporate additional family items such as controls, MEP connectors, and nested components; Create specific families including in place families, profiles, annotations, and parameters. The student guide also contains discipline specific practices for families including doors, windows, railings, pipe fittings, light fixtures, gusset plates, and built up columns.

**Prerequisites:** Students should be comfortable with the fundamentals of the Autodesk Revit software as found in the Autodesk Revit 2017 R1 Architecture Fundamentals, Autodesk Revit 2017 R1 Structure Fundamentals, or Autodesk Revit 2017 R1 MEP Fundamentals student guides. Knowledge of basic techniques is assumed, such as creating standard element, copying and moving elements, and creating and working with views, etc.
