The elevated structural framework subjected to mechanical vibration is the subject matter of the third part. The fourth and final part discusses the precast reinforced concrete workshop building. The important activities required to be carried out prior to structural analysis structural arrangement planning materials selection examination of buildability and environmental impact are covered in the initial chapters in each part. This is followed by a step by step presentation of the analysis and design procedures for various structures and structural elements members. The book presents the various structural analyses and design calculations in an exhaustive manner. The text is illustrated with a large number of visuals. Important additional information relevant to this field can be found in the references provided at the end of various chapters. The STRAP structural analysis program for the multi storeyed administrative office building and the vibration analysis of the elevated reinforced concrete framed structure are provided in the Annexures to the book.
