Engineering Design Communication Conveying Design Through Graphics :

Engineering Design Communication Shawna D. Lockhart, Cindy M. Johnson, 2000 The emphasis of the book reflects the changes that many institutions are incorporating including the importance of sketching 3D solid modeling and the use of design databases throughout the engineering process FEATURES BENEFITS Presents sketching and modeling techniques in the context of the design process Organization more closely reflects industry practice Users first learn to sketch their ideas to transform 2D sketches into 3D models to refine the models and use them for analysis and finally to use the models to document the design as they would on a project Gives the user a strong framework for understanding why they should learn to sketch when it is appropriate to use different kinds of models and what they need to discover in order to prepare a model for manufacture Includes a chapter on exporting and using the model data for downstream applications including rapid prototypes that presents additional considerations for creating a useful design database Emphasizes sketching and visualization techniques throughout the text Designer s Notebook feature highlights the use of sketching in the context of industrial practice Reinforces the role of sketching in each chapter through the entire design process Users learn to use a full range of drawing views and projections in their sketches in early chapters Actual sketches used as illustrations allow the reader to compare their efforts with other sketches not instrument or CAD drawings Encourages users to keep a notebook of sketches by showing how practicing engineers use sketching Emphasizes solid and parametric modeling software as a means to building a design database Presents the big picture of the many uses of the CAD database Anchoring modeling techniques in the context of design helps users build an understanding of design intent as they learn to model Aids users in evaluating the strengths and weaknesses of the software they are learning to use in lab by providing a comparison of modeling methods Encourages the reader to think about the broader context for their models so they plan for flexibility downstream applications and manufacture as they are learning to model Fosters a real world approach to engineering communication Through the use of industry cases that profile practice in major corporation Present specific instances of general principles presented in the text giving users a clear idea of the contemporary software tools and techniques used to create design Show how design goals influence the way models are made Presents a wide variety of software and presentation tools That an engineer will use to help visualize design

Graves, 2017-12-07 Writing Assignments Across the University Curriculum as a whole asks and answers these questions What kinds of documents do students write in a wide range of university degree programs in Canada How do instructors structure those writing assignments That is who is the audience for the assignments Do students get formative feedback as they develop their documents Do the patterns we found in a small liberal arts college Graves Hyland and Samuels 2010 occur in other kinds of universities We took our cue from an article by Anson and Dannels 2009 who pointed us toward the idea that students experience a curriculum through their degree progress in an academic program Consequently we needed to map the writing assignments according to how different departments organized these degree programs Results that were organized by curricular unit departments faculties or colleges or programs units were more significant than general statistics because students would progress through these courses to a degree Several chapters in the book describe how this kind of curricular mapping provided a spark for curricular reform in Engineering Education and an entire small university The last two chapters report on the instructors perspective on their assignments what they were intending to do and why they both resisted and engaged in curricular discussions **Proceedings of the Sixth International Conference on Computer**
