Del Casino Jr., Natalie Marie Gulsrud, Sarah Barns, 2023-10-18 Artificial intelligence AI is now mediating and in some cases seen to be controlling key urban services and infrastructures thus becoming a prominent feature of the contemporary city As portrayed in recent studies the autonomous city can be understood as a city where urban artificial intelligences perform tasks and take on roles which have traditionally been the domain of humans At stake in these debates are questions related to the meaning and ongoing role of intelligence for both humans and machines While autonomous cars transport people service robots run shops drones deliver goods and city brains govern entire cities humans are redefining the meaning of what smart means in the city and what role the human being may play in future urban spaces With humans shifted to new sectors of the economy or pushed aside by algorithms and robotic agents creating new ways of seeing and governing the city we raise the question as to whether or not cities are becoming more autonomous from human experience in the sense that their operation does not rely as much on human inputs anymore

The Dynamic Structure of Everyday Life Philip Agre, Massachusetts Institute of Technology. Artificial Intelligence Laboratory, 1988 A running argument means continually redeciding what to do Continually redeciding what to do is more flexible than executing a plan because it is more responsive to opportunities and contingencies It is possible to approximate the ideal of continual redecision because life is wholly a routine The routine portion of the reasoning leading to each moment's action can be implemented very efficiently by recording the reasons behind any novel bits of reasoning a method known as dependency maintenance A computer program called the running argument illustrates this point Leadership for Digital Transformation Kristina Bodrožić-Brnić, Volker Schulte, Thomas Thiessen, 2025-01-24 This book focuses on innovative leadership in change management amid digital business transformation By combining theoretical insights with practical guidance case studies and a transdisciplinary approach it not only provides up to date insights for researchers but also equips leaders with the skills knowledge and tools necessary to successfully guide their organisations through the challenges and opportunities of the digital age It primarily emphasises placing human considerations at the forefront of discussions regarding digital transformation The book features contributions that tackle essential topics such as developing a digital mindset the psychological challenges of digital transformation and innovative leadership roles addressing specific areas such as small and medium sized companies the creative industry family run businesses and aspects of the Gen Z generation It emphasises the use of innovative technologies such as AI to explore diverse perspectives on risk taking responsible leadership building a resilience culture international views on managing digitalisation and the strategic use of communication in digital change processes Under the three focus areas Success Factors and Innovative Leadership in Digital

Change Management Digital Transformation in Counterpoint to Conventional Methods and Leadership Mindset for Digital Transformation it transcends conventional literature by offering a transdisciplinary investigation of leadership in the digital age revealing crucial perspectives and delivering actionable strategies to meet the evolving challenges of organisational change This volume provides valuable insights and knowledge tailored for professionals in business and management but is equally beneficial for researchers and students aiming to deepen their theoretical understanding Additionally it offers practical guidance and real world case studies to support consultants entrepreneurs and policymakers alike
