Autism Team York:

Neurodevelopmental Disabilities Dilip R. Patel, Donald E. Greydanus, Hatim A. Omar, Joav Merrick, 2011-04-07

Increasingly more and more children with developmental disabilities survive into adulthood. Pediatricians and other clinicians are called upon to care for an increasing number of children with developmental disabilities in their practice and thus there is a need for a practical guide specifically written for paediatricians and primary care clinicians that addresses major concepts of neurodevelopmental pediatrics. In the United States the specialty training leading to a conjoint board certification by the American Board of Pediatrics and American Board of Psychiatry and Neurology requires a total of 6 years of training: 2 years of pediatrics, 1 year of neurology, 18 months of child neurology, 18 months of neurodevelopmental disabilities. As of December 2006 in the US there were 241 pediatricians and 55 child neurologists certified in the subspecialty of Neurodevelopmental Disabilities. Thus most of the children with developmental disabilities are seen by pediatricians and therefore it is important for these pediatricians to be well informed of common issues in the field. The 60,000 or so pediatricians in the United States and hundreds more in other countries are the main target audience for a practical book on neurodevelopmental pediatrics.

Education and Training in Mental Retardation and Developmental Disabilities

,2001-03 **Handbook of Child and Adolescent Group Therapy** Craig Haen, Seth Aronson, 2016-10-14 This handbook describes in detail different contemporary approaches to group work with children and adolescents. Further, this volume illustrates the application of these models to work with the youth of today, whether victims of trauma, adolescents struggling with LGBT issues, or youth with varying common diagnoses such as autism spectrum disorders, depression, and anxiety. It offers chapters presenting a variety of clinical approaches written by experts in these approaches, from classic play therapy and dialectical behavior therapy to cutting edge attachment based intervention, mindfulness, and sensorimotor psychotherapy. Because of its broad scope, the book is suitable for a wide audience, from students to first-time group leaders to seasoned practitioners.

Education at Risk Garth

Allen, 1997 Six essays in which social scientist Allen emphasizes the importance of education in society and the need to safeguard its quality. He examines decisions about the British curriculum, in particular the rise of personal and social education and the political clamor for active citizenship. He then considers children at risk because of civil conflict or political struggle based on his research in Mozambique in the middle 1990s: the role of schooling in the development of autistic children, the constraints upon academic institutions in modern society, the stresses and strains of academic life, the roles of universities and their obligations to the wider community. *The Autocar*, 1907 **The British National Bibliography**
