**The Politics of Dissensus** Kari Palonen, José María Rosales, Tapani Turkka, 2014-05-05 The Politics of Dissensus inverts the traditional perspective on the study of parliamentary politics by focusing on its less obvious and less well known aspects. Dissensus instead of consensus becomes the condition for the intelligibility of parliamentary politics. Such politics is indebted to the rhetorical culture of addressing issues from opposite perspectives and debating the alternatives pro et contra. No motion is approved without a thorough examination of and confrontation among imaginable alternatives. Establishing the openness of political debating, parliamentarism has become a distinctive historical contribution to the rise of parliamentary democracy. Parliament in Debate refers to the paradigmatic institution for political deliberation, the debates surrounding its legislative activity as well as the supervision of government and administration. Parliament has become a fascinating object of scrutiny as a political institution adopted and developed by different political traditions. In a nutshell, the book retrieves the study of parliamentary politics to present political theory and action in the parliamentary mode. It is a book on the relevance of parliamentarism to the study of politics and a book on the comparative conceptual and institutional history of parliamentary politics. The Politics of Dissensus: Parliament in Debate is the outcome of an international team of contributors coordinated by two ongoing research projects relying on a long-lasting international cooperation, namely the Academy of Finland project The Politics of Dissensus and the Spanish National Research Fund projects The Rhetorics of Democracy and The Civic Constellation.

**Machine Art in the Twentieth Century** Andreas Broeckmann, 2016-12-23 An investigation of artists' engagement with technical systems, tracing art historical lineages that connect works of different periods. Machine art is neither a movement nor a genre but encompasses diverse ways in which artists engage with technical systems. In this book, Andreas Broeckmann examines a variety of twentieth and early twenty-first century artworks that articulate people's relationships with machines. In the course of his investigation, Broeckmann traces historical lineages that connect art of different periods, looking for continuities that link works from the end of the century to developments in the 1950s and 1960s and to works by avant-garde artists in the 1910s and 1920s. An art historical perspective, he argues, might change our views of recent works that seem to be driven by new media technologies but that in fact continue a century-old artistic exploration. Broeckmann investigates critical aspects of machine aesthetics that characterized machine art until the 1960s and then turns to specific domains of artistic engagement with technology: algorithms and machine autonomy, looking in particular at the work of the Canadian artist David Rokeby, vision and image and the advent of technical imaging and the human body using the work of the Australian artist Stelarc as an entry point to art that couples the machine to the body mechanically or cybernetically. Finally, Broeckmann argues that systems thinking and ecology have brought about a fundamental shift in the meaning of technology, which has brought with it a rethinking of human subjectivity. He examines a range of artworks, including those by the Japanese artist Seiko Mikami, whose work exemplifies the shift.
