Ideal for the single variable one calculus course. Calculus I 8 e contains the first 6 chapters of Calculus 8 e. The text continues to offer instructors and students new and innovative teaching and learning resources. The Calculus series was the first to use computer generated graphics. Third Edition to include exercises involving the use of computers and graphing calculators. Fourth Edition to be available in an interactive CD ROM format. Fifth Edition to be offered as a complete online calculus course. Sixth Edition and to offer a two semester Calculus I with Precalculus text. Every edition of the book has made the mastery of traditional calculus skills a priority while embracing the best features of new technology and when appropriate calculus reform ideas. Now the Eighth Edition is the first calculus program to offer algorithmic homework and testing created in Maple so that answers can be evaluated with complete mathematical accuracy. Two primary objectives guided the authors in writing this book: to develop precise, readable materials for students that clearly define and demonstrate concepts and rules of calculus, and to design comprehensive teaching resources for instructors that employ proven pedagogical techniques and save the instructor time. The Eighth Edition continues to provide an evolving range of conceptual, technological, and creative tools that enable instructors to teach the way they want to teach and students to learn the way they learn best. The Larson program offers a variety of options to address the needs of any calculus course and any level of calculus student, enabling the greatest number of students to succeed. The explanations, theorems, and definitions have been thoroughly and critically reviewed. When necessary, changes have been made to ensure that the text is pedagogically sound, mathematically precise, and comprehensible. The exercise sets have been carefully and extensively examined to ensure they cover all calculus topics appropriately. Many new exercises have been added at the suggestion of a number of calculus instructors. A variety of exercise types are included in each exercise set: Questions involving skills, writing, critical thinking, problem solving, applications, and real data applications are included throughout the text. Exercises are presented in a variety of question formats, including matching, free response, true/false, modeling, and fill-in-the-blank. The Eduspace online resources have been integrated into a comprehensive learning system that combines numerous dynamic calculus resources with online homework and testing materials. The Integrated Learning System addresses the changing needs of today's instructors and students. Recognizing that the calculus course is presented in a variety of teaching and
