Intelligence Systems in Environmental Management: Theory and Applications Cengiz Kahraman, İrem Uçal Sari, 2016-09-03 This book offers a comprehensive reference guide to intelligence systems in environmental management. It provides readers with all the necessary tools for solving complex environmental problems where classical techniques cannot be applied. The respective chapters written by prominent researchers explain a wealth of both basic and advanced concepts including ant colony genetic algorithms, evolutionary algorithms, fuzzy multi-criteria decision-making tools, particle swarm optimization, agent-based modelling, artificial neural networks, simulated annealing, Tabu search, fuzzy multi-objective optimization, fuzzy rules, support vector machines, fuzzy cognitive maps, cumulative belief degrees, and many others. To foster a better understanding, all the chapters include relevant numerical examples or case studies. Taken together, they form an excellent reference guide for researchers, lecturers, and postgraduate students pursuing research on complex environmental problems. Moreover, by extending all the main aspects of classical environmental solution techniques to its intelligent counterpart, the book presents a dynamic snapshot on the field that is expected to stimulate new directions and stimulate new ideas and developments.

Plastic Waste Management Kalim Deshmukh, Jyotishkumar Parameswaranpillai, 2024-03-11 Plastic Waste Management: Comprehensive resource on innovative and breakthrough developments in plastic waste management covering a wide range of processing techniques and applications. Plastic Waste Management offers a complete guide to the best plastic waste management practices through recycling, incineration, landfill, and other processes; discusses applications of plastic waste management including energy generation, biochemical production, construction, and food packaging; covering current challenges relating to plastic waste, explaining the sources of waste and their routes into the environment, and providing systematic coverage of plastic waste treatment methods including mechanical processing, monomerization, blast furnace feedstock gasification, and thermal recycling. The book also discusses different biodegradation mechanisms of plastic wastes and ecotoxicity and ecological implications of marine plastic debris. From a cultural perspective, the book provides information regarding environmental and health implications, societal issues, and current challenges associated with plastic waste management. Written by leading experts in the field and edited by two highly qualified academics, Plastic Waste Management covers specific sample topics such as: A roadmap towards a circular economy and environmental sustainability via effective management strategies for plastic wastes; Implementation of an analytical hierarchy process for developing better waste collection systems and chemical recycling of plastic waste for sustainable development; Mechanisms, perspectives, and challenges for natural biodegradation of plastic wastes and conversion of plastic wastes into value-added materials; Plastic wastes management and disposal in developing countries and challenges and strategies for plastic waste management during and post COVID-19 pandemic. Plastic Waste Management is a highly valuable resource for scientists and researchers working in the fields of environmental science, environmental engineering, and plastic engineering.

[A two level interval valued neutrosophic AHP integrated TOPSIS methodology for post-earthquake fire risk assessment: An application for Istanbul](#) Pelin Gulum,Ertugrul Ayyildiz,Alev Taskin Gumus, Earthquakes are the leading natural disasters that seriously affect human life Furthermore earthquakes are natural disasters that have the ability to trigger a second disaster in addition to the damages they cause From this point of view post earthquake fires are defined as the one of the most dangerous secondary disasters after an earthquake and often cause even more serious dangers For this reason government officials and relevant decision makers should effectively determine post earthquake fire risks and take necessary precautions In this study we consider the

problem of determining the fire risk after an earthquake as a multi criteria decision problem and present a two level framework for risk assessment The main and sub criteria are determined by a detailed literature review and Modified Delphi method is employed to gain and consolidate expert opinions

IoT-Based Data Analytics for the Healthcare Industry Sanjay Kumar Singh,Ravi Shankar Singh,Anil Kumar Pandey,Sandeep S Udmale,Ankit Chaudhary,2020-11-07 IoT Based Data Analytics for the Healthcare Industry Techniques and Applications explores recent advances in the analysis of healthcare industry data through IoT data analytics The book covers the analysis of ubiquitous data generated by the healthcare industry from a wide range of sources including patients doctors hospitals and health insurance companies The book provides AI solutions and support for healthcare industry end users who need to analyze and manipulate this vast amount of data These solutions feature deep learning and a wide range of intelligent methods including simulated annealing tabu search genetic algorithm ant colony optimization and particle swarm optimization The book also explores challenges opportunities and future research directions and discusses the data collection and pre processing stages challenges and issues in data collection data handling and data collection set up Healthcare industry data or streaming data generated by ubiquitous sensors cocooned into the IoT requires advanced analytics to transform data into information With advances in computing power communications and techniques for data acquisition the need for advanced data analytics is in high demand Provides state of art methods and current trends in data analytics for the healthcare industry Addresses the top concerns in the healthcare industry using IoT and data analytics and machine learning and deep learning techniques Discusses several potential AI techniques developed using IoT for the healthcare industry Explores challenges opportunities and future research directions and discusses the data collection and pre processing stages

Fuzzy Analytical Hierarchy Process Disposal Method: Bestsellers in 2023 The year 2023 has witnessed a remarkable surge in literary brilliance, with numerous engrossing novels captivating the hearts of readers worldwide. Lets delve into the realm of bestselling books, exploring the engaging narratives that have enthralled audiences this year. The Must-Read : Colleen Hoover's "It Ends with Us" This touching tale of love, loss, and resilience has captivated readers with its raw and emotional exploration of domestic abuse. Hoover skillfully weaves a story of hope and healing, reminding us that even in the darkest of times, the human spirit can prevail. Uncover the Best : Taylor Jenkins Reids "The Seven Husbands of Evelyn Hugo" This spellbinding historical fiction novel unravels the life of Evelyn Hugo, a Hollywood icon who defies expectations and societal norms to pursue her dreams. Reids absorbing storytelling and compelling characters transport readers to a bygone era, immersing them in a world of glamour, ambition, and self-discovery. Discover the Magic : Delia Owens "Where the Crawdads Sing" This evocative coming-of-age story follows Kya Clark, a young woman who grows up alone in the marshes of North Carolina. Owens spins a tale of resilience, survival, and the transformative power of nature, entrancing readers with its evocative prose and mesmerizing setting. These top-selling novels represent just a fraction of the literary treasures that have emerged in 2023. Whether you seek tales of romance, adventure, or personal growth, the world of literature offers an abundance of engaging stories waiting to be discovered. The novel begins with Richard Papen, a bright but troubled young man, arriving at Hampden College. Richard is immediately drawn to the group of students who call themselves the Classics Club. The club is led by Henry Winter, a brilliant and charismatic young man. Henry is obsessed with Greek mythology and philosophy, and he quickly draws Richard into his world. The other members of the Classics Club are equally as fascinating. Bunny Corcoran is a wealthy and spoiled young man who is always looking for a good time. Charles Tavis is a quiet and reserved young man who is deeply in love with Henry. Camilla Macaulay is a beautiful and intelligent young woman who is drawn to the power and danger of the Classics Club. The students are all deeply in love with Morrow, and they are willing to do anything to please him. Morrow is a complex and mysterious figure, and he seems to be manipulating the students for his own purposes. As the students become more involved with Morrow, they begin to commit increasingly dangerous acts. The Secret History is a brilliant and thrilling novel that will keep you guessing until the very end. The novel is a warning tale about the dangers of obsession and the power of evil.
