advanced educational ideas of the time and to look at the subject from the standpoints of the teacher the mechanic the boy and the amateur workman The treatment is neither general nor superficial but elementary and no claim is made that it will carry anyone very far in the various subjects but it aims to be thorough and specific as far as it goes and to teach nothing which will have to be unlearned Great care based upon an extended experience with boys and amateurs has been taken to include only what can be profitably done by an intelligent boy of from ten to eighteen or by the average untrained worker of more mature years It is hoped that from the variety of subjects treated he may find much of the information for which he may seek if not in the exact form desired perhaps in some typical form or something sufficiently similar to suggest to him what he needs to know It is hoped and confidently believed that a work so comprehensive in scope and giving such a variety of designs with detailed and practical directions for their execution will be not merely novel but may serve as a vade mecum and ready reference book for the amateur of constructive tastes Wood-Working Tools Boston Industrial School Association,2014-03 This is a reproduction of a book published before 1923 This book may have occasional imperfections such as missing or blurred pages poor pictures errant marks etc that were either part of the original artifact or were introduced by the scanning process We believe this work is culturally important and despite the imperfections have elected to bring it back into print as part of our continuing commitment to the preservation of printed works worldwide We appreciate your understanding of the imperfections in the preservation process and hope you enjoy this valuable book The below data was compiled from various identification fields in the bibliographic record of this title This data is provided as an additional tool in helping to ensure edition identification Wood working Tools How To Use Them A Manual Industrial School Association Boston D C Heath Woodwork Crafts House Woodwork Manual training Woodworking tools **Timber and tools, a text-book for manual training classes, to accompany 'Woodwork for schools'**.
