

# Computer Architecture VS Computer Organization

| Computer Architecture   | Computer Organization   |
|---|---|
| Computer Architecture is concerned with the way hardware components are connected together to form a computer system. | Computer Organization is concerned with the structure and behaviour of a computer system as seen by the user. |
| It acts as the interface between hardware and software.   | It deals with the components of a connection in a system.   |
| Computer Architecture helps us to understand the functionalities of a system.   | Computer Organization tells us how exactly all the units in the system are arranged and interconnected.       |
| A programmer can view architecture in terms of instructions, addressing modes and registers.                          | Whereas Organization expresses the realization of architecture.   |
| While designing a computer system architecture is considered first.   | An organization is done on the basis of architecture.   |
| Computer Architecture deals with high-level design issues.  | Computer Organization deals with low-level design issues.   |
| Architecture involves Logic (Instruction sets, Addressing modes, Data types, Cache optimization)                      | Organization involves Physical Components (Circuit design, Address, Finite Registers)                         |
