Witness System Simulation Modeling Lanner:

Planning of Eco-efficient Process Chains for Automotive Component Manufacturing Christopher Schmidt,2021-01-04 This book includes the introduction of emerging manufacturing technologies and planning cases with established technologies The planning of eco efficient process chains is crucial for manufacturing companies However in the state of the art planning various barriers exist towards the integration of the environmental dimension Against this background a concept for the integration of classic lean and environmental criteria into the three planning phases of process chains is presented During concept planning the Technology Assessment Tool supports planners in the identification of eco efficient technologies During rough planning the Value Stream Design Tool enables the derivation of a production line based on workpiece characteristics For detailed planning tools for eco efficient machine and process chain configuration are provided Three case studies from large scale automotive component manufacturing with established and emerging technologies demonstrate the tool applicability

Software Engineering Methods in Intelligent Algorithms Radek Silhavy,2019-05-07 This book presents software engineering methods in the context of the intelligent systems It discusses real world problems and exploratory research describing novel approaches and applications of software engineering software design and algorithms The book constitutes the refereed proceedings of the Software Engineering Methods in Intelligent Algorithms Section of the 8th Computer Science On line Conference 2019 CSOC 2019 held on line in April 2019

Port Planning and Management Simulation Wenyan Wang,Yun Peng,2021-10-27 Port Planning and Management Simulation examines port planning simulation applications showing how they supports better port decision making Using a clear organizational format based on actual port system structure and operation processes the book provides practical and theoretical insights on port planning and management The book describes the water land collecting and distributing components of the port system focusing on management development and risk mitigation It examines the key challenges based on discrete system simulation theory that is less affected by local or national regulations It compares various simulation scenarios for optimal port operational strategy It quantifies port emissions analyzes the impact of different reduction strategies and presents operational strategies for green port planning developmentmand management Port Planning and Management Simulation provides guidance for carrying out deep analysis in a complex and dynamic system providing an integrated solution framework based on simulation techniques for improving efficiency and cost savings of the port system Bridges the gaps between theory practice and policy Comprehensive practical and multidisciplinary content Case Studies

Management Systems. Competitive Manufacturing for Innovative Products and Services Christos Emmanouilidis, Marco Taisch, Dimitris Kiritsis, 2013-08-13 The two volumes IFIP AICT 397 and 398 constitute the thoroughly refereed post conference proceedings of the International IFIP WG 5.7 Conference on Advances in Production Management Systems APMS 2012 held in Rhodes Greece in September 2012. The 182 revised full papers were carefully reviewed and selected for inclusion in the two volumes. They are organized in 6 parts: sustainability design, manufacturing and production management, human factors, learning and innovation, ICT and emerging technologies in production management, product and asset lifecycle management, and services supply chains and operations.

Environmental Software Systems. Fostering Information Sharing Jiří Hřebíček, Gerald Schimak, Miroslav Kubásek, Andrea E. Rizzoli, 2013-09-08 This book constitutes the refereed proceedings of the 10th IFIP WG 5.11 International Symposium on Environmental Software Systems ISESS 2013 held in Neusiedl am See Austria in June 2013. The 65 revised full papers presented were carefully reviewed and selected from numerous submissions. The papers are organized in the following topical sections: environmental application in the scope of the future Internet, smart and mobile devices used for environmental applications, information tools for global environmental assessment, environmental applications in risk and crises management, SEIS as a part of the 7th environment action programme of EU, human interaction and human factors driving future EIS, EDSS developments, environmental management accounting and statistics, and information systems and applications.

Proceedings of the ... Winter Simulation Conference, 2002 *Simulation Modeling and Analysis* Averill M. Law, W. David Kelton, 2000 This is a book on the theory and practice of simulation and includes new material on object oriented simulation techniques and communication networks. Featured software has been upgraded to FORTRAN and C. Midwest Simulation Modeling and Analysis, Sixth Edition

Averill M. Law, 2025-02-21 Comprehensive state of the art coverage of every important simulation technique. This fully revised book has the most comprehensive and up to date coverage of all aspects of a simulation study. Equally well suited for use in university courses, simulation practice and self study, the book offers clear and intuitive explanations as well as 300 figures, 218 examples and 217 problems. You will get detailed discussions on modeling and simulation, simulation software, model verification and validation, input modeling, random number and variate generation, statistical design and analysis of simulation experiments, experimental design, simulation optimization, agent based simulation, machine learning and much more. Authored by an operations research analyst and industrial engineer with more than 40 years of experience, *Simulation Modeling and Analysis* is widely regarded as the bible of simulation and now has more than 178,000 copies in print and 23,700 citations. This sixth edition has been streamlined with several chapters downsized to eliminate outdated simulation programs or statistical techniques that are rarely used in practice and are unnecessarily complicated. Most analyses of simulation output data can now be done using three simple and familiar statistical formulas or expressions. A new chapter covers AI and machine learning and their application to simulation. Covers what are arguably the three most innovative and
