Structuralism And Poststructuralism For Beginners:

Structuralism and Poststructuralism For Beginners Donald D. Palmer, 2007-08-21 What is Structuralism How is it possible And once the structures of Structuralism have been discovered how is Poststructuralism possible Thus begins Don Palmer's Structuralism and Poststructuralism For Beginners If Nobel or Pulitzer ever made a prize for making the most difficult philosophers and ideas accessible to the greatest number of people one of the leading candidates would certainly be Professor Don Palmer From his Sartre For Beginners and Kierkegaard For Beginners to his Looking at Philosophy author/illustrator Don Palmer has the magic touch when it comes to translating the most brutally difficult ideas into language and images that non-specialists can understand In its less dramatic versions writes Palmer structuralism is just a method of studying language society and the works of artists and novelists But in its most exuberant form it is a philosophy an overall worldview that provides an account of reality and knowledge Poststructuralism is a loosely knit intellectual movement comprised mainly of ex-structuralists who either became dissatisfied with the theory or felt they could improve it Structuralism and Poststructuralism For Beginners is an illustrated tour through the mysterious landscape of Structuralism and Poststructuralism The book's starting point is the linguistic theory of Ferdinand de Saussure The book moves on to the anthropologist and literary critic Claude Lévi-Strauss the semiologist and literary critic Roland Barthes the Marxist philosopher Louis Althusser the psychoanalyst Jacques Lacan the deconstructionist Jacques Derrida Learn among other things why structuralists say Reality is composed of not Things but Relationships Every object is both a presence and an absence The total system is present in each of its parts The parts are more real than the whole The book concludes by examining the postmodern obsession with language and with the radical claim of the disappearance of the individual obsessions that unite the work of all these theorists

What is a Book? David Kirby, 2002 In *What Is a Book* David Kirby addresses the making and consuming of literature by redefining the four components of the act of reading writer reader critic and book He discusses his students his work and his practice as a teacher writer critic and reader and positions his theories and opinions as products of real life as much as academic exercise Among the ideas animating the book are Kirby's beliefs that devotion is more important than dissection and practice is more important than theory Covering an impressive range of writers from Emerson Poe and Melville to James Dickey Charles Wright Richard Howard Susan Montez and others Kirby considers the evolution of critical theory from the nineteenth century to the late twentieth and explores the role of criticism in contemporary culture Drawing from his experience writing poetry and reading to children at a local housing project he

answers two of his four central questions What is a reader and What is a writer In the largest section of the book What Is a Critic Kirby demonstrates his passionate engagement with the function of the critic in literary culture and offers both overviews and close examinations of literary theory book reviewing and the historical background of criticism from its earliest beginnings In the final section of the book he addresses the question What is a book with an examination of the reading preferences of older readers Kirby s analysis of those responses along with his own notions of the literary canon is an insightful excursion into how books are valued Deeply learned and wonderfully entertaining What Is a Book is a lucid look at the whole of literary culture Kirby makes us think about the books we love and why we love them

Sartre and Psychoanalysis Betty Cannon,1991 Betty Cannon is the first to explore the implications of Sartrean philosophy for the Freudian psychoanalytic tradition Drawing upon Sartre s work as well as her own experiences as a practicing therapist she shows that Sartre was a fellow traveler who appreciated Freud s psychoanalytic achievements but rebelled against the determinism of his metatheory The mind Sartre argued cannot be reduced to a collection of drives and structures nor is it enslaved to its past as Freud s work suggested Sartre advocated an existentialist

psychoanalysis based on human freedom and the self's ability to reshape its own meaning and value Through the Sartrean approach Cannon offers a resolution to the crisis in psychoanalytic metatheory created by the current emphasis on relational needs By comparing Sartre with Freud and influential post-Freudians like Melanie Klein Otto Kernberg Margaret Mahler D W Winnicott Heinz Kohut Harry Stack Sullivan and Jacques Lacan she demonstrates why the Sartrean model transcends the limitations of traditional Freudian metatheory In the process she adds a new dimension to our understanding of Sartre and his place in twentieth century philosophy
