through central contracts has increased steadily the ICT initiatives have resulted in some savings and there are signs that departments are starting to think more intelligently about why and how they use ICT But the accountability arrangements for centralised procurement remain a barrier the centre manages the contracts yet departments remain liable for their own spending decisions so they are reluctant to cede authority to the centre Management information on spending and savings is incomplete so departments do not always trust the figures on savings claimed These gaps in accountability and data make it harder to make the case for procurement across central government and in the wider public sector to be centralised The commitment to localism seems to be at odds with buying through central contracts and government s desire to give more government business to small firms does not appear to have changed the way large procurements are managed
