based on all the empirical research and Frankl's self-transcendence model, Wong has developed the existential positive psychology of suffering (PP2.0) as the foundation for flourishing. Here are a few main tenets of PP2.0: 1. Life is suffering and a constant struggle throughout every stage of development. 2. The search for self-transcendence is a primary motive, guided by the meaning mindset and mindful mindset. 3. Wellbeing cannot be sustainable without overcoming and transforming suffering.

In this Research Topic, we welcome diverse approaches discussing the following points: The dialectic process of overcoming the challenges of every stage of development as necessary for personal growth and self-transcendence; The role of self-transcendence in resilience, virtue, meaning, and happiness; The upside of negative emotions; The new science of resilience based on cultivating the resilient mindset and character; How to make the best use of suffering to achieve our potentials; mental health.
