## ABSTRACT

There have been many on-going debates on the agreement to the meaning of administration, leadership and management. This paper explores the distinctions between educational administration, educational leadership and educational management and what are entailed in terms of their differences and similarities in nature.

**Keywords:** Educational Administration, Educational Leadership, Educational Management.

## Introduction

*"Leaders are truly of this world and simultaneously apart. They are temporal and ephemeral beings. Their personal and professional relationships are so close, yet so far away" (Sullivan, 2004, p. 19).*

*"...inspiring hope is the first and last responsibility of the educational leader" (Walker, 2005, p. 29).*

How does one distinguish between educational administration, educational leadership and educational management? Obviously, the response to this question will be by investigating what past researchers in these educational fields say about each of these terms. In almost all of the books or articles the author has cited there have been debates on the agreement to the meaning of administration, leadership and management. Nevertheless, Cunningham and Cordeiro (2006) stated that agreement was reached in defining administration as the broadest term related to organisational responsibility, leadership focused on organisational direction and purpose, and management, on the other hand focused on the efficient use of resources. Furthermore, leadership is about doing the right things, management is doing things right, and administration is responsible for both leadership and management. Administrators carry the biggest burden because they are expected to be effective leaders and efficient managers.

In this paper, the author will investigate firstly the definition of educational administration and the essence within this area. In the next section the author will provide past researchers' explanations on the use of each of the educational terms. The third section however, deals with

Exploring Elite Schools and Inclusive Child-centred Sex and Relationships Education Matthew Round, 2026-01-23

Contributing to the body of literature that applies Bourdieu to the study of educational institutions this novel volume considers how elite schools could successfully incorporate inclusive equitable sex and relationship education RSE within the existing mechanisms of continuing professional development CPD to provide a programme based on the needs and discomfort of both students and teachers Using a case study approach focusing on elite schools the book considers the socio political nature of sex education in England from a Bourdieuan perspective while also incorporating aspects of Foucauldian normative power into political analysis to give broader international appeal The book demonstrates how Bourdieu and his toolkit can be used to consider the sociological structures that allow for the construction and thus deconstruction of social norms within elite education Chapters provide insights gathered from an understanding of the social fabric of elite schooling and the traditional heteronormative ethos of such schools As a result recommendations are put forward regarding the development of CPD supporting the successful implementation of inclusive and comprehensive sex education in elite schools Calling for schools to develop cultures of conversation and dialogue rather than pedagogies of exposure and discomfort in the context of both sex education and teacher training this book will benefit academics and postgraduate students in the fields of sex education research methods in education and secondary education more broadly

**Beyond Leadership** Scott Eacott, 2017-11-06

This book systematically elaborates Scott Eacott's relational approach to organizational theory in education Contributing to the relational trend in the social sciences it first surveys relational scholarship across disciplines before providing a nuanced articulation of the relational research program and key concepts such as organizing activity auctors and spatio temporal conditions It also includes critical commentaries on the program from key figures such as Tony Bush Megan Crawford Fenwick English Helen Gunter Izhar Oplatka Augusto Riveros and Dawn Wallin As such the text models an approach to social epistemology for building knowledge claims in relation rather than through parallel monologues Eacott's relational

approach provides a distinctive post Bourdieusian variant of the relational sociological project Shifting the focus of inquiry from entities e g leaders organizations to organizing activity and recognizing how auctors generate simultaneously emerging from and constitutive of spatio temporal conditions unsettles the orthodoxy of organizational theory in educational administration and leadership By presenting its claims in the context of other approaches the book stimulates intellectual debate among both relational sociologists and opponents of relational approaches Beyond Leadership provides significant insights into the organizing of education As it does not fit neatly into any one field but instead blends educational administration and leadership organizational studies and relational sociology among others it charts new territory and promotes important dialogue and debate
