

Chapter 7 Study Guide

1) Define cognition and cognitive psychology.

- Cognition: is a general term for all forms of knowing, including both content and processes.
- Cognitive Psychology: the study of human mental processes and their role in thinking, feeling, and behaving.

2) What are reaction times and why are they utilized in cognitive psychology?

Reaction times are the amount of time it takes experimental participants to perform particular tasks. They are used in cognitive psychology to test how some cognitive processes are carried out. Use reaction times to determine whether processes are carried out in parallel or serially.

3) Describe serial and parallel processing.

- Serial processing: a separate examination of each individual element in an array, one after the other, (ex: studying vocabulary words).
- Parallel processing: a simultaneous examination of all elements, (ex: listening and replying).

4) Define controlled and automatic processing.

- Controlled Processes: require attention, thus exacting greater demand. Can become automatic.
- Automatic Processing: generally does not require attention and can often be performed along with other tasks w/o interference.

5) Explain what is meant by insightful problem-solving.

An "ah-ha" moment. Can stem from experience with previous problem-solving, or it can appear to be completely original.

6) Compare and contrast deductive and inductive reasoning.

Deductive reasoning involves correctly applying logical rules. Involves specific knowledge and representational sources brought together to solve a problem. While inductive reasoning uses available evidence to generate likely, but not certain, conclusions.

7) Describe algorithms, analogical problem-solving, and heuristics

- Algorithms: Utilizing a formula or set of rules that, if followed, ensures a solution.
- Analogical problem solving: understanding a current situation through its analogy between features of the current situation and those previous ones.
- Heuristics: Incorporating a "rule of thumb" or a broad application of a strategy. Allows you to decrease the number of possible solutions to a size that is more manageable. No guarantee of a correct solution.
