Bilingualism And Cognitive Development:

Bilingualism and Cognitive Development Kenji Hakuta,1986 **The Effects of Bilingualism on Cognitive Development** Yvonne Enid Gonzalez Rodriguez,1992 Bilingualism in Development Ellen Bialystok,2001-04-16

Bilingualism in Development is an examination of the language and cognitive development of bilingual children focusing primarily on the preschool years It begins by defining the territory for what is included in bilingualism and how language proficiency can be conceptualized Using these constraints the discussion proceeds to review the research relevant to various aspects of children s development and assesses the role that bilingualism has in each The areas covered include language acquisition metalinguistic ability literacy skill and problem solving ability In each case the performance of bilingual children is compared to that of similar monolinguals and differences are interpreted in terms of a theoretical framework for cognitive development and processing The studies show that bilingualism significantly accelerates children s ability to selectively attend to relevant information and inhibit attention to misleading information or competing responses This conclusion is used as the basis for examining a set of related issues regarding the education and social circumstances of bilingual children

Sandra Epstein Ben-Zeev,1972 **Childhood Bilingualism** Peter Homel,Michael Palij,Doris Aaronson,2014-02-24 First published in 1987 This volume is based primarily on a conference on childhood bilingualism held at New York University on June 25 and 26 1982 with an interest in exploring the nature of bilingual cognition and the effect of bilingualism on psychological development *The effect of bilingualism on the cognitive development of students* Augusto Eduardo Benavides,1983 *Social-cognitive Development of Bilingual and Monolingual Children* Mindy T. Sperling,1989

Language Processing in Bilingual Children Ellen Bialystok,1991-05-09 A collection of papers that explore bilingual children coping with two language systems Cognitive Perspectives on Bilingualism Monika Reif,Justyna A. Robinson,2016-04-25 Only 15 years ago bilingualism was somewhat outside the main debates in cognitive linguistics Cognitive linguistics had to a large extent taken for granted the fact that language is embodied in our experience However not much attention was given to questions of whether any changes to our language repertoire alter the way we perceive the world around us A growing body of recent research suggests that one cannot understand the cognitive foundations of language without looking at bi and multilingual speakers In this vein the present book aims to contribute to the existing debate of the relationship between language culture and cognition by assessing differences and similarities between monolingual and bilingual language acquisition and use In particular it investigates the effect of conceptual semantic and

pragmatic properties of constructions on code choice and code switching as well as the impact of bilingual and bicultural education on speakers cognitive development This collective volume systematises reviews and promotes a range of theoretical perspectives and research techniques that currently inform work across the disciplines of bilingualism and code switching **The Influence of Bilingualism on Cognitive Development and Cognitive Strategy** Sandra Ben-Zeev,1988

Bilingualism in a Multilingual Society Ajit K. Mohanty,1994 **Bilingualism and cognitive control** Judith F. Kroll,Ingrid Christoffels,Teresa Bajo, Research on bilingual language processing reveals an important role for control processes that enable bilinguals to negotiate the potential competition across their two languages The requirement for control that enables bilinguals to speak the intended language and to switch between languages has also been suggested to confer a set of cognitive consequences for executive function that extend beyond language to domain general cognitive skills Many recent studies have examined aspects of how cognitive control is manifest during bilingual language processing how individual differences in cognitive resources influence second language learning and performance and the range of cognitive tasks that appear to be influenced by bilingualism However not all studies demonstrate a bilingual advantage in all tasks that tap into cognitive control Indeed many questions are unanswered that are critical to our understanding of bilingual control What aspects of cognitive control are enhanced for proficient bilinguals How are individual differences in cognitive control related to language acquisition proficiency or professional translation skill How does the language environment affect concurrent processing How exactly does language control come about in tasks such as speech production switching between languages or translation When and how does inhibitory processing support language control The focus of this Research Topic is on executive control and bilingualism The goal is to have a broad scope that includes all of these issues We seek empirical contributions using different methodologies including behavioral computational and neuroscience approaches We also welcome theoretical contributions that provide detailed discussion of models or mechanisms that account for the relationship between bilingualism and cognitive control We aim to provide a platform for new contributions that represent a state of the art overview of approaches to cognitive control in bilingualism We hope that this Research Topic will enable the field to formulate more precise hypotheses and causal models on the relation between individual differences cognitive control and bilingual language processing [The Effects of Bilingualism on Development During Early Childhood](#) Lenore Arnberg,1981
