**The Materials of Engineering: Iron and steel, 4th ed** Robert Henry Thurston,1888 **Manufacturing Process for Engineering Materials Fifth Edition Instructor's Copy** , Introduction to Manufacturing Processes John A. Schey,1987 This revision aims to address changes that have taken effect since the publication of the second edition The most significant change has been in the attitude of industry to concurrent engineering In 1987 mostly lip service was paid to it today it has become general practice in most competitive corporations In the second edition the author discussed this as the manufacturing system In the third edition it becomes the focal point Concurrent engineering involves the whole product realization process including product concept performance criteria mechanical design and analysis materials selection process planning and modeling production control automation assembly management and others An introductory text cannot possibly cover all of these topics hence the emphasis of the third edition remains on the physical principles and the application of these principles to processes The major difference relative to the second edition will be the emphasis on interactions between process and design Capabilities and limitations of processes will be highlighted to show what they mean in terms of design possibilities and design modifications will be suggested for ease of manufacture Impact on the environment and possibilities for recycling will be woven into the entire text Information Sources in Engineering Roderick A. MacLeod,Jim Corlett,2005 The aim of each volume of this series Guides to Information Sources is to reduce the time which needs to be spent on patient searching and to recommend the best starting point and sources most likely to yield the desired information The criteria for selection provide a way into a subject to those new to the field and assists in identifying major new or possibly unexplored sources to those who already have some acquaintance with it The series attempts to achieve evaluation through a careful selection of sources and through the comments provided on those sources
