Staugaard,2002 Welcome to the third edition of my C text The highly successful first edition was one of the first textbooks available for teaching C in the first programming course The text was introduced at the 1994 ACM Conference in Phoenix when many were arguing the virtues of teaching C and OOP versus Pascal and structured programming in the first programming course I argued at the time and still argue that students need to be taught problem solving early on using both the structured and object oriented paradigms and because of its hybrid nature C is the only language suited to learning both of these paradigms Since then many institutions have made the switch from Pascal to C for just this reason as well as the intense industry support for C language As a result this third edition continues to provide an introduction to both structured and object oriented problem solving techniques using the C language Of course many improvements have been made based on using the text in numerous classrooms all over the world since 1994 As with earlier editions the text starts from the beginning assuming no previous knowledge of C or any other programming language This text is appropriate for any introductory programming CS1 course using the C language as well as experienced programmers wanting an introduction to structured and object oriented problem solving techniques using the C language Book Preface **Understanding Programming and Problem Solving with C++** Kenneth A. Lambert,Douglas W. Nance,1996 This text features a gradual approach to object oriented programming that covers problem solving and algorithm development but also offers solid grounding in objects and classes Problem solving is emphasized throughout the text

Friedman,Elliot B. Koffman,Robin Koffman,1999 This best selling text now includes coverage of the AP string class and apvectors As with the original this book stresses problem solving techniques while introducing students to object oriented concepts early The system defined string and stream classes and a user defined money class are used to reinforce the importance of data modeling in programming The vector version contains all of the classic learning features readers have come to know and trust in authors Frank Friedman and Elliot Koffman These features include case studies program style sections syntax display boxes end of section exercises common error sections chapter reviews quick check exercises and programming projects High school teachers If you are interested in using this text for your Advanced Placement Computer Science course please send your name and address to c ap awl com for more information This book will come bundled with Addison Wesley s Review for the Computer Science AP Exam in C High Schools ordering this book should use the following ISBN 0 201 35761 5 0201357569B04062001

Lambert,Douglas W. Nance,Thomas L. Naps,1997 Developed from the model used successfully in the Naps and Nance full year texts in Pascal this book combines Lambert and Nance s Understanding Programming and Problem Solving with C and Lambert and Naps s Understanding Program Design and Data Structures with C into a single CS1 CS2 text Hence Introduction to Computer Science with C solves the problem of where to begin CS2 that can occur when C is the teaching language It also saves students money they don t have to buy two separate texts This full year introduction to CS1 CS2 features a gradual approach that covers problem solving and algorithm development while giving students a solid grounding in objects and classes Throughout the book a highly structured approach to programming produces programs that are easy to read debug and modify Examples are carefully developed using pseudocode structure charts and module specifications Programming Problems and Projects at the end of each chapter feature numerous programming assignments They reflect a variety of areas business math etc and ask students to build on programs written for earlier chapters and to practice their communication skills   *Fundamentals of C++ and Data Structures, Advanced*
