

Lesson 4

The K to 12 Basic Education Curriculum: A Brief Introduction

Lesson 1 introduced us to a typical curriculum which is a reflection of what we hold dear as a people and as a nation, what we aspire for, and what drives us toward sustainability, peace, and economic stability.

Lesson 2 clarified our focus by defining the three key terms - curriculum, development, and system - that serve as centerpiece of discussions in this course.

Lesson 3 introduced us to various defining concepts attached to curriculum and curriculum development, systems, and processes.

From various concepts, the final part of module 1 will bring us to reality and will concretize such concepts. To do this, we will look into the current basic education curriculum - the K to 12 curriculum - in the country.

Welcome to Lesson 4.

New Horizons in Mathematics and Science Education, 2001. *Elementary and Middle School Mathematics* John A. Van de Walle, 1998. John A. Van de Walle has written a book that helps readers make sense of mathematics and become confident in their ability to teach mathematics to children K to 8. Elementary and Middle School Mathematics consists of 16 chapters reflecting the view that all mathematics can be taught through a problem solving approach that motivates children and builds their confidence as they learn. This book thoroughly discusses the new standards and clearly develops four key aspects of teaching mathematics: the nature of mathematics as a science of pattern and order; an understanding of how children learn mathematics; a problem solving view of teaching mathematics; and specific methods for integrating assessment with instruction. Simple yet effective classroom activities are woven throughout the chapters as well as suggestions for technology and literature.
