

## ELEMENTS OF A GRID

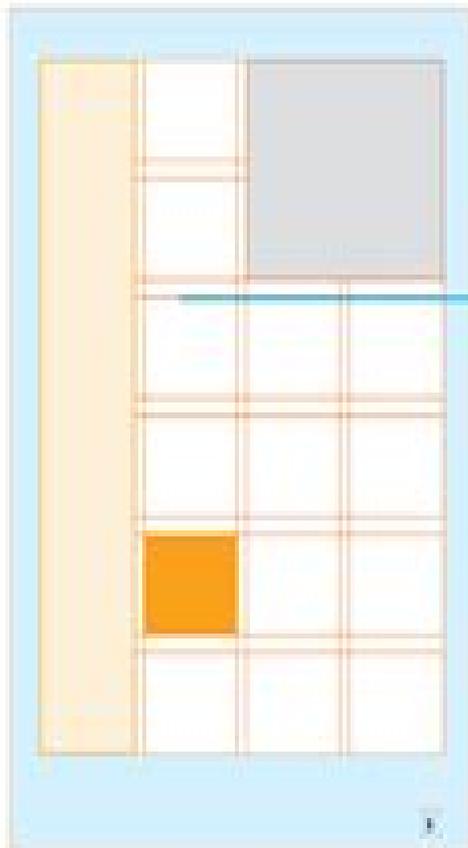

### 1. Know the Components

The main components of a grid are margins, columns, columns, leading, tracking, gutter lines, and baselines. Starting with a page that is four pages wide and four pages high, let's see how these components work together to create a grid.

**MARGINS** are vertical columns that define the space between the text and the edges of the page. The width and number of margins on a page or across the entire spread are determined by the content.

**MODULES** are individual elements, typically, repeated across a grid. Consistent modules can create interest and ease of reading.

**MARGINS** are the space between the text and the edges of the page. The width and number of margins on a page or across the entire spread are determined by the content.

**MARGINS** are groups of columns or rows that are used to define the space between the text and the edges of the page.

**BASELINES** are elements that define the vertical position of the text. Baselines are used to align the text and to create a consistent reading experience.

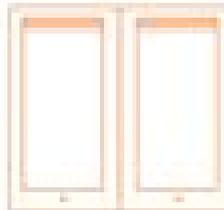

**MARGINS** are the space between the text and the edges of the page. The width and number of margins on a page or across the entire spread are determined by the content.
