Name: _____
Date: _____ Activity: _____

Part 1: Attraction and Repulsion

1. Select the simulation below the name of the program and click on "Attraction and Repulsion".
2. a) Rub the balloon on the sweater and the simulation will show the balloon sticking to the sweater. b) Rub the balloon on the sweater and the simulation will show the balloon sticking to the sweater. c) Rub the balloon on the sweater and the simulation will show the balloon sticking to the sweater.

3. Explain the difference between attraction and repulsion. Attraction is when two objects with opposite charges pull towards each other. Repulsion is when two objects with the same charge push away from each other. This happens because of the forces between the positive and negative charges. Opposite charges attract, and like charges repel.

4. In the simulation, if the red balloon is rubbed on the sweater and the yellow balloon is rubbed on the sweater, the red balloon will stick to the yellow balloon. This is because both balloons have a positive charge and they will repel each other.
