Metal Ions and Complexes in Solution Ingmar Persson, Toshio Yamaguchi, 2023-12-04 Based on a translated Japanese title published in 2012 this book provides fundamental aspects of experimental and computational methods the properties and structure of solvents ion solvation and equilibria and reactions of metal complexes in solution It includes state of the art details on metal complexes in newly developing sustainable liquids and applications in real life Appealing to researchers working in coordination chemistry including students and industrialists the text uses exercises tables and figures to help the reader with their understanding of the topic

Functionalization of Semiconductor Surfaces Franklin Tao, Steven Bernasek, 2012-03-16 This book presents both fundamental knowledge and latest achievements of this rapidly growing field in the last decade It presents a complete and concise picture of the the state of the art in the field encompassing the most active international research groups in the world Led by contributions from leading global research groups the book discusses the functionalization of semiconductor surface Dry organic reactions in vacuum and wet organic chemistry in solution are two major categories of strategies for functionalization that will be described The growth of multilayer molecular architectures on the formed organic monolayers will be documented The immobilization of biomolecules such as DNA on organic layers chemically attached to semiconductor surfaces will be introduced The patterning of complex structures of organic layers and metallic nanoclusters toward sensing techniques will be presented as well

Polyamine Drug Discovery Patrick M. Woster, Robert Anthony Casero, 2012 This is the first comprehensive description of the discovery and therapeutic potential of polyamine drugs

Trace Metals in Aquatic Systems Robert P. Mason, 2013-05-13 This book provides a detailed examination of the concentration form and cycling of trace metals and metalloids through the aquatic biosphere and has sections dealing with the atmosphere the ocean lakes and rivers It discusses exchanges at the water interface air water and sediment water and the major drivers of the cycling concentration and form of trace metals in aquatic systems The initial chapters focus on the fundamental principles and modelling approaches needed to understand metal concentration speciation and fate in the aquatic environment while the later chapters focus on specific environments with case studies and research highlights Specific examples deal with metals that are of particular scientific interest such as mercury iron arsenic and zinc and the book deals with both pollutant and required nutrient metals and metalloids The underlying chemical principles controlling toxicity and bioavailability of these elements to microorganisms and to the aquatic food chain are also discussed Readership Graduate students studying environmental chemistry and related topics as well as scientists and managers interested in the cycling of trace substances in aqueous systems Additional resources for this book can be found at www.wiley.com/go/mason/tracemetals

Immunology Ivan Maurice Roitt, Jonathan Brostoff, David K. Male, 1998 This classic and concise text describes immunologic mechanisms and their purpose importance while illustrations display complex structures processes and interactions Exceptional full color artwork chapter objectives summary headings critical thinking

questions and updated references citing current literature continue to keep the book out front in a constantly advancing discipline Neuroendocrine immunology and nutrition and immunity are among the new topics covered and there is significantly increased coverage of AIDS

Basic Concepts of Chemistry Leo J. Malone, Theodore O. Dolter, 2012-04-13 Basic Concepts of Chemistry was originally written over thirty years ago to address the needs of general chemistry students with little or no background in chemistry Over time the text has evolved beyond purposes solely aimed at a preparatory chemistry course For some preparatory chemistry students a main sequence in general chemistry may follow but for others a semester of organic and biochemistry may follow Other students enroll to simply satisfy a basic science or chemistry requirement The text was written with a level and functionality designed to accommodate the needs of each of these varied groups of students Basic Concepts of Chemistry was designed with a flexibility that allows instructors to emphasize or omit certain clearly delineated sections The mission of the text has evolved in response to the increased diversity of students and the emphasis on outcomes assessment

Protein Purification Jan-Christer Janson, Lars Rydén, 1998 This is a state of the art sourcebook on modern high resolution biochemical separation techniques for proteins It contains all the basic theory and principles used in protein chromatography and electrophoresis

[Chemical Approaches to Understanding Enzyme Catalysis](#) Bernard S. Green, Y. Ashani, D. Chipman, 1982

Transition Metal Sulfur Chemistry Edward I. Stiefel, 1996 This volume provides an overview of sulfur coordinated transition metal complexes It explores how studies of transition metal sulfur sites facilitate understanding of enzymatic and industrial catalytic systems and it reviews recent research on synthetic analogs to nitrogenase and other transition metal sulfur enzymes relevant to industrial desulfurification The volume examines synthesis X ray structures and reactivity of transition metal sulfur complexes

Modern Physical Organic Chemistry Eric V. Anslyn, Dennis A. Dougherty, 2006 Making explicit the connections between physical organic chemistry and critical fields such as organometallic chemistry materials chemistry bioorganic chemistry and biochemistry this book escorts the reader into an area that has been thoroughly updated in recent times
