

10. If you are given different frequency table, which method will be the most appropriate?

Answer:

1. If the data is given in frequency table, then we will use the following method.

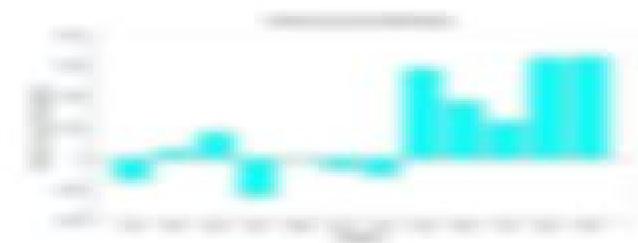

Example: The following table represents the distribution of marks obtained by the 100 students in the 100 marks test. Find the mode.

Answer:

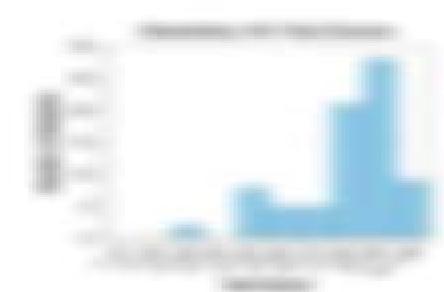

1. In the graph, the class of maximum height is called the height of the bar representing the maximum of data in each category.

Example: The following bar graph shows the number of students in each class in a school. Find the mode.

Answer:

1. In a histogram, the height of each bar represents the frequency of the corresponding class. Therefore, the class having maximum height will have the maximum frequency.
